CRIME AND JUSTICE IN NEW YORK STATE

1982 ANNUAL REPORT

This is the eighth annual report of the criminal justice system in New York State, prepared pursuant to the responsibility assigned to the Division of Criminal Justice Services (DCJS) by Chapter 654 of the laws of 1974. This document reflects not only offense and arrest data reported by law enforcement agencies, but also includes an overview of the roles played by other segments of the criminal justice community in responding to the problem of crime in New York State.

DCJS is most appreciative for continued cooperation and support of nearly 600 police departments, sheriffs' offices and specialized police agencies participating in all aspects of the Uniform Crime Reporting program. Their efforts have proven invaluable in assisting DCJS to carry out its reporting responsibilities.

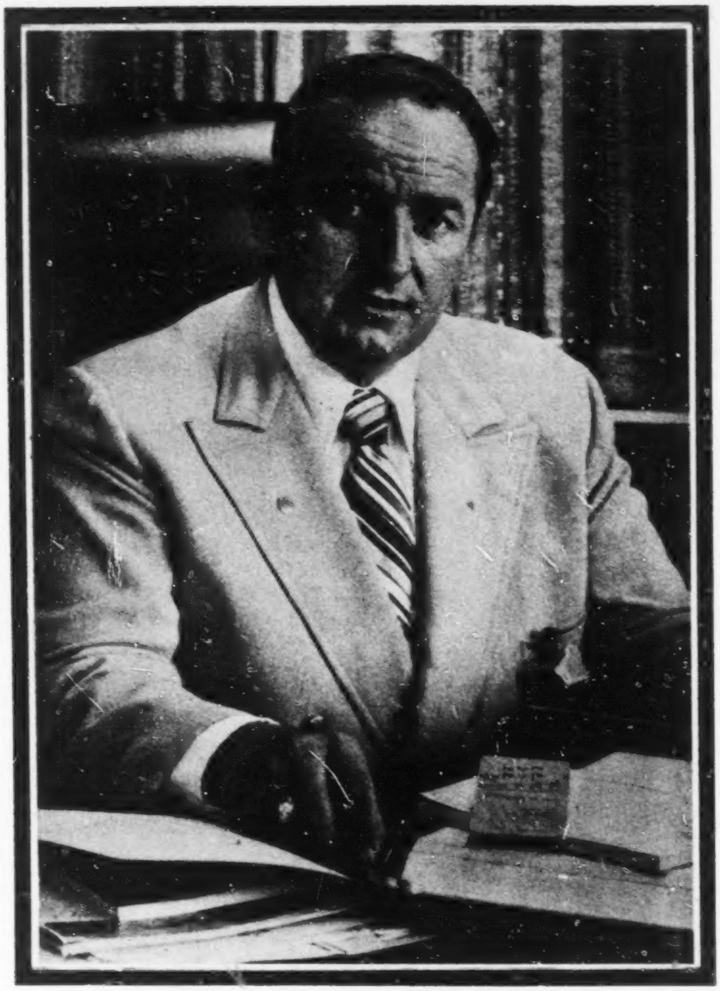
Data concerning the processing of felons is also reported to DCJS by the District Attorney and Special Prosecutor offices throughout the state to whom we express our appreciation for their continued cooperation and assistance.

In an effort to provide a broad and comprehensive overview of the criminal justice process, data from the courts, probation, corrections, parole and the Crime Victims Board have been once again included in the report. We are indebted to the State Administrator of the Courts, the Director of Probation, the Commissioner of Correctional Services, the Chairman of the Board of Parole, the Chairman of the Commission of Correction, the Director of the Division for Youth and the Chairman of the Crime Victims Board. The inclusion of information from these agencies insures that the Crime and Justice Annual Report is truly representative of the entire criminal justice community.

We trust that the contributions and counsel of those who have participated in the preparation of this report will assist us to continue to provide the people of the State of New York with a keener and deeper insight into the problem of crime in New York State.

Richard J. Condon
Commissioner

IN MEMORIAM



FRANK J. ROGERS
1933-1983

COMMISSIONER OF THE DIVISION OF CRIMINAL JUSTICE SERVICES

APRIL 22, 1975 TO JANUARY 30, 1983

FOREWORD

In this 1982 report on Crime and Justice, we are pleased to report a significant reduction of 6.8% in the crime level of Index offenses compared to that reported in 1981. Although the rate has dropped for the first time in four years (1978), the crime level of 1982 is still well above that of 1975, the first year in which the Division of Criminal Justice Services collected Uniform Crime Reports.

Some criminal justice researchers attribute the decline in the crime rate to a reduction in the number of persons that make up the "arrest prone age group." Still other researchers claim the down trend can be traced to finally feeling the result of various crime reduction programs, such as career criminal and neighborhood watch programs, etc. Only time will verify or refute these hypotheses.

A decrease in the volume of crime, regardless of the cause, must not deter the search for better methods and programs to protect the individual, his property and the whole of society. The fear of violent and non-violent crime inhibits individual freedom, while lesser offenses and so-called victimless crimes are costly and destructive to the fabric of the community.

The goals that we establish now are the standard against which we must judge our success in the future. These goals can be achieved through the cooperation and dedication of government, the criminal justice community and the general public.

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1975, pursuant to Chapter 654 of the laws of 1974. In assuming that responsibiity, the Division was also committed to providing relevant data to the National Uniform Crime Reporting program administered by the Federal Bureau of Investigation. This publication is the eighth annual report produced in discharge of that responsibility.

Uniform Crime reports submitted monthly by police agencies in New York State are the basis for much of the material contained in this report. These reports include information on Part I offenses, Part II offenses, location and time of the offense, value of property stolen, Part I arrests, Part II arrests, law officers killed or assaulted and number of law enforcement employees. In 1982, all 585 law enforcement agencies participated in the Uniform Crime Reporting program and agencies with multi-county jurisdictions reported separately for each county within their jurisdictions.

Police agencies also submit supplementary reports on homicide and arson offenses. These detailed reports allow for a more in-depth analysis of these serious crimes.

In addition to the Uniform Crime Reporting data contained in this report, we have provided data on felony arrests, felony drug arrests and felony indictments and dispositions. The arrest material is derived from the Computerized Criminal History (CCH), which is based on the arrest fingerprint cards submitted to the Division of Criminal Justice Services in compliance with section 160.20 of the Criminal Procedure Law. Felony arrests and felony drug arrests are presented for each county from 1978 through 1982. The felony indictments and disposition material is reported by District Attorneys and Special Prosecutors throughout the State and is authorized by Section 837a of the Executive Law. This material includes data on felony indictments, felony drug indictments, felony dispositions, felony drug dispositions and median time from indictment through disposition.

Information from other criminal justice agencies is included in this report in order to present in one volume as much information as possible about the criminal justice system. Agencies that have submitted data and are included in this report are: the Office of Court Administration, the Division of Probation, the Department of Correctional Services, the Commission of Correction, the Division of Parole, the Division for Youth and the Crime Victims Board.

For many reasons not all offenses come to the attention of the police. Victims may feel too embarrassed to report a crime or that the loss sustained was too small to report or feel that there is nothing the police can do. Victimization studies have confirmed that many offenses are never reported. When an offense is cleared, it is usually done by one or more arrests. However, there are exceptional circumstances when an offense may be cleared without an arrest. Exceptional clearances result when the police know who the offender is, where he is, and have enough evidence to support an arrest but are prevented from doing so because of some reason outside their control.

The UCR data included in this report are divided into five main segments:

A. Reports of Part I offenses comprising the following crime classifications:

1. Criminal Homicide
    - a. Murder and Non-Negligent Manslaughter
    - *b. Negligent Manslaughter
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Burglary
6. Larceny
7. Motor Vehicle Thefts

*All of the above, with the exception of 1(b) Negligent Manslaughter, comprise the Crime Index, which is used to measure the relative extent of crime nationwide and to show trends in crime.

We have also attempted to provide greater detail about reported index crime including:

- a. Type of weapon/force used
- b. Type of location in which the crime was committed
- c. Number of offenses cleared
- d. Type and amount of property stolen and recovered

B. Part II offenses

8. Arson
    Commercial, Residential or Motor Vehicle
9. Kidnapping
10. Controlled Substance
    Sale/Manufacture-Opium Cocaine, Derivatives, Marijuana, Synthetic Narcotics, Other Dangerous Drugs
11. Dangerous Weapons
    Handguns, Other Firearms, Explosives, Other Weapons
12. Bribery
13. Sex Offenses
14. Extortion
15. Forgery & Counterfeiting

16. Prostitution & Vice
    Promoting Prostitution, Prostitution and Patronizing Prostitutes
17. Stolen Property
18. Coercion
19. Criminal Mischief
20. Fraud
21. Gambling
    Bookmaking, Numbers & Lottery, All Other Gambling
22. Offenses Against Public Order
23. Embezzlement
24. Simple Assault
25. Offenses Against Family
26. Drive Under Influence Alcohol, Drugs
27. Unauthorized Use of Vehicle
28. Possession of Burglar Tools
29. Liquor Law Violations
30. Disorderly Conduct
31. Public Drug Intoxication
32. Loitering
33. All Other Offenses

C. Age, Sex, Race and Ethnic Origin of Persons Arrested

1. Persons Under 16 Years of Age (Juvenile)
2. Persons 16 Years of Age and Over (Adults)

The arrest reports reflect the number of persons arrested for Part I and Part II offenses, as described above.

NOTE: The FBI/UCR program treats persons under 18 as juveniles, and requires that they be so reported. This report, however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

D. Law Enforcement Officers Killed or Assaulted

Statistics are provided on the number of New York State law enforcement officers killed or assaulted and description in some detail, of the conditions under which the officers were assaulted.

E. Homicide Analysis

This portion of the report provides detail on homicides committed in New York State, describing the victims and circumstances under which such homicides occurred.

F. Arson Analysis

This portion of the report provides additional detail concerning the offense arson. The analysis describes in more detail the types of structures involved, distribution of activity and clearance rates.

G. Domestic Violence

Statistics are shown relating to the incidence of Domestic Violence in New York State. The statistics are presented by the geographic locations of New York City, Suburban Counties and Upstate Counties.

In order to combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location, is not sufficiently definitive. Therefore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State in accordance with state law.

It is important to note that without the collaboration of the law enforcement agencies and cooperation of other criminal justice agencies, this report would not be possible.

POPULATION DATA SOURCE

Population data used for calculating crime rates for the 1982 Crime and Justice Report are final 1980 census data.

STATUTORY AUTHORITY

The collection, analysis and dissemination of criminal justice data in New York State is authorized by Sections 837, 837-a and 837-b of the Executive Law, to wit:

"§ 837. Functions, powers and duties of division

The division shall have the following functions, powers and duties:

... 4. In cooperation with the state administrator of the unified court system as well as any other public or private agency,

... (c) collect and analyze statistical and other information and data with respect to the number of crimes reported or known to peace officers, the number of persons arrested for the commission of offense, the offense for which the persons was arrested, the county within which the arrest was made and the accusatory instrument filed, the disposition of the accusatory instrument including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pled guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-a. Additional functions, powers and duties of the division

In addition to the functions, powers and duties otherwise provided by this article, the division shall:

1. Collect and analyze statistical and other information and data with respect to the number of persons charged with the commission of a felony by indictment or the filing of a superior court information, the felony with which the persons was charged therein, the county within which the indictment or superior court information was filed, the disposition thereof including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pleaded guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-b. Duties of courts and peace officers

1. It is hereby made the duty of the state administrator of the unified court system; and of every sheriff, county or city commissioner of correction and head of every police department, state, county or local, and also railroad, steamship, park, aqueduct and tunnel police and town constables, of every district attorney, of every probation agency; and of head of every institution or department, state, county, and local, dealing with criminals and of every other officer, person or agency, dealing with crimes or criminals or with delinquency or delinquents, to transmit to the commissioner not later than the fifteenth day of each calendar month, or at such times as provided in the rules and regulations adopted by the commissioner, such information as may be necessary to enable him to comply with subdivision four of section eight hundred thirty-seven. Such reports shall be made upon forms which shall be supplied by the commissioner.

2. Such officers and agencies shall install and maintain records needed for reporting data required by the commissioner and shall give him or his accredited agents access to records for the purpose of inspection.

3. For every neglect to comply with the requirements of this section, the commissioner may apply to the supreme court for an order directed to such persons responsible requiring compliance. Upon such application the court may issue such order as may be just, and a failure to comply with the order of the court shall be a contempt of court and punishable as such."

THE

PROBLEM

OFFENSES

The incidence of crime in New York State is a matter of serious concern not only to members of the criminal justice community, but also to society at large. A recognized barometer which probably most accurately reflects crime trends today is the reporting of Index offenses.

Index offenses, which include murder, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft - totaled 1,129,324 in New York State in 1982, down 6.8% from the 1,212,080 reported in 1981. Each of the offense categories showed a decrease with the exception of motor vehicle theft which increased 0.1%. Both New York City and Upstate showed decreases in the total number of Index offenses. New York City recorded a 5.2% drop and Upstate declined 9.3%. Although the 1982 Index total for New York State is below the 1980 and 1981 totals, it is still above the totals for 1975 through 1979.

Comparisons of crime rates between police agencies or counties should be made only with extreme caution. The crime rates published in this report are based solely on offenses reported or known to the police and the resident population. Additional factors which may influence crime rates are density of population, age of population, geographic location, topography, social attitudes, economic conditions, number of police officers, seasonal and transient population and rural or urban environments.

VIOLENT OFFENSES

The violent offenses include murder, forcible rape, robbery and aggravated assault. In New York State violent offenses dropped 7.4% from 1981 to 1982. New York City, which reported 82.7% of the violent offenses, registered a 8.3% decrease in violent offenses and Upstate was down 2.6%. In New York City over 30% of the violent offenses involved the use of handguns versus 10% Upstate. Violent offenses constituted 15.4% of the Index total.

NON-VIOLENT OFFENSES

The offenses of burglary, larceny and motor vehicle theft make up the non-violent Index offenses. Statewide, non-violent offenses decreased 6.7% from 1981 to 1982. New York City reported a 4.3% decrease in non-violent offenses, while Upstate was down 9.7%. Non-violent offenses are more evenly distributed than violent offenses, with New York City accounting for 57.1% and Upstate 42.9%.

MURDER AND NON-NEGLIGENT MANSLAUGHTER

Murder and non-negligent manslaughter offenses decreased from 2,171 in 1981 to 2,011 in 1982, a drop of 7.4%. New York City reported 82.9% of the murder and non-negligent manslaughter offenses in New York State and showed a drop of 8.7% from 1981 to 1982. Upstate registered a miniscule decrease of 0.6%. Murder and non-negligent manslaughter offenses made up 0.2% of the Index total and had the highest clearance rate (69.2%) among Index offenses.

FORCIBLE RAPE

Statewide, forcible rape offenses declined 6.4% form 1981 to 1982 and the 5,132 rape offenses are the lowest number reported since 1976. New York City reported an 8.2% decrease while Upstate dropped 2.2%. Nearly 70% of the rape offenses were reported from New York City. Handguns were employed in 11.2% of the rape offenses and other weapons were used in an additional 39.0% of the offenses. The clearance rate for rape offenses was 47.6%. Rape offenses made up 0.5% of the Index offenses and 2.9% of the violent offenses.

ROBBERY

Robbery offenses, which constitute 61.7% of the violent offenses in New York State, dropped 10.7% form 1981 to 1982. Nearly 90% of the robbery offenses are reported from New York City. Handguns were used in 34.2% of the robberies in New York State. Streets were the scene of 55.9% of the robberies in the state, with residences the next most prevalent location with an additional 16.7% of the robberies. Although the mumber of robberies decreased from 1981 to 1982, the number of clearances increased by 5.2%. The clearance rate for robberies was 21.7% in 1982 versus 18.5% in 1981.

AGGRAVATED ASSAULT

Aggravated assault offenses registered a decrease of 0.9% in New York State from 1981 to 1982. Handguns were used in 15.5% of the aggravated assaults and other firearms in another 1.7% of the offenses. However, other weapons such as blunt instruments, were the most frequently used weapon in aggravated assaults, at 32.3 %. The street and residences were the location where 74.1% of the aggravated assaults took place. Over 55% of the assault offenses were cleared by the police agencies in New York State. Aggravated assault offenses accounted for 34.2% of the violent offenses.

BURGLARY

Burglary offenses, with a 16.5% decrease from 1981 to 1982, recorded the largest drop among the Index offenses. In 1982, 291,747 burglary offenses were reported, 57,825 less than the 349,572 recorded in the previous year. This figure represents the lowest reported level in five years. Both New York City and Upstate contributed to the decrease, with New York City down 16.1% and Upstate 17.1%. Residential burglaries dropped 19.5% versus a 9.4% decline for non-residential burglaries. No force was required to gain entrance in 21.1% of the residential burglaries. As in previous years, the preponderance of residential burglaries occurred during the day and non-residential burglaries at night. Burglaries were cleared at a 13.0% rate.

LARCENY

The 526,480 larceny offenses reported in 1982 represented a 2.1% decrease from the previous year. Larceny offenses accounted for 46.6% of the Index total. Among 1982 larceny offenses, 39.0% involved thefts two hundred dollars and over, 28.7% fifty to one hundred and ninety-nine dollars and 32.3% under fifty dollars. Despite the overall decrease in larcenies, there was a 4.4% increase in larcenies two hundred dollars and over. Larcenies from motor vehicles and motor vehicle parts accounted for 40.3% of all larcenies. Theft of motor vehicle parts and accessories rose 7.4% despite the overall declining trend in larcenies. The 39,020 bicycle thefts reported in 1982 were the fewest since these data were first published in 1977. Larceny offenses were cleared at a 15.2% rate.

MOTOR VEHICLE THEFT

Motor vehicle theft was the only Index offense to increase from 1981 to 1982, up a slight 0.1%. The 136,959 motor vehicle thefts reported in New York State in 1982 were a record high. New York City reported 78.4% of the motor vehicle thefts. The average value of a motor vehicle was $3,950 in 1982. Motor vehicle thefts were cleared at a 7.2% rate. The recovery of a vehicle in and by itself does not constitute a clearance.

PART II OFFENSES

Part II offenses totaled 1,395,881 in New York State in 1982, up 16.2% from the 1,201,003 reported in 1981. Comprising Part II offenses are all other crimes not included in Part I offenses. These offenses range in seriousness from kidnapping to local ordinances. Criminal mischief and disorderly conduct made up 26.2% of the Part II offenses. "All Other Offenses", which include local violations in New York City, accounted for 44.9% of the Part II offenses. New York City reported 55.4% of the Part II offenses and Upstate 44.6%

Part II offenses were cleared at a 69.2% rate. The high clearance rate is influenced by those offenses where an arrest is made virtually at the same time that the offense is committed.

PROPERTY STOLEN

In New York State, the value of property stolen during the commission of Part I offenses in 1982 was $1,230,342,667, down 3.9% from 1981. Less than 14% of the value of stolen property was recovered. Losses from motor vehicle theft rose 10.1% while the value fo property stolen in burglaries declined 20.4%. Of the total property loss, motor vehicle theft accounted for 44.0%.

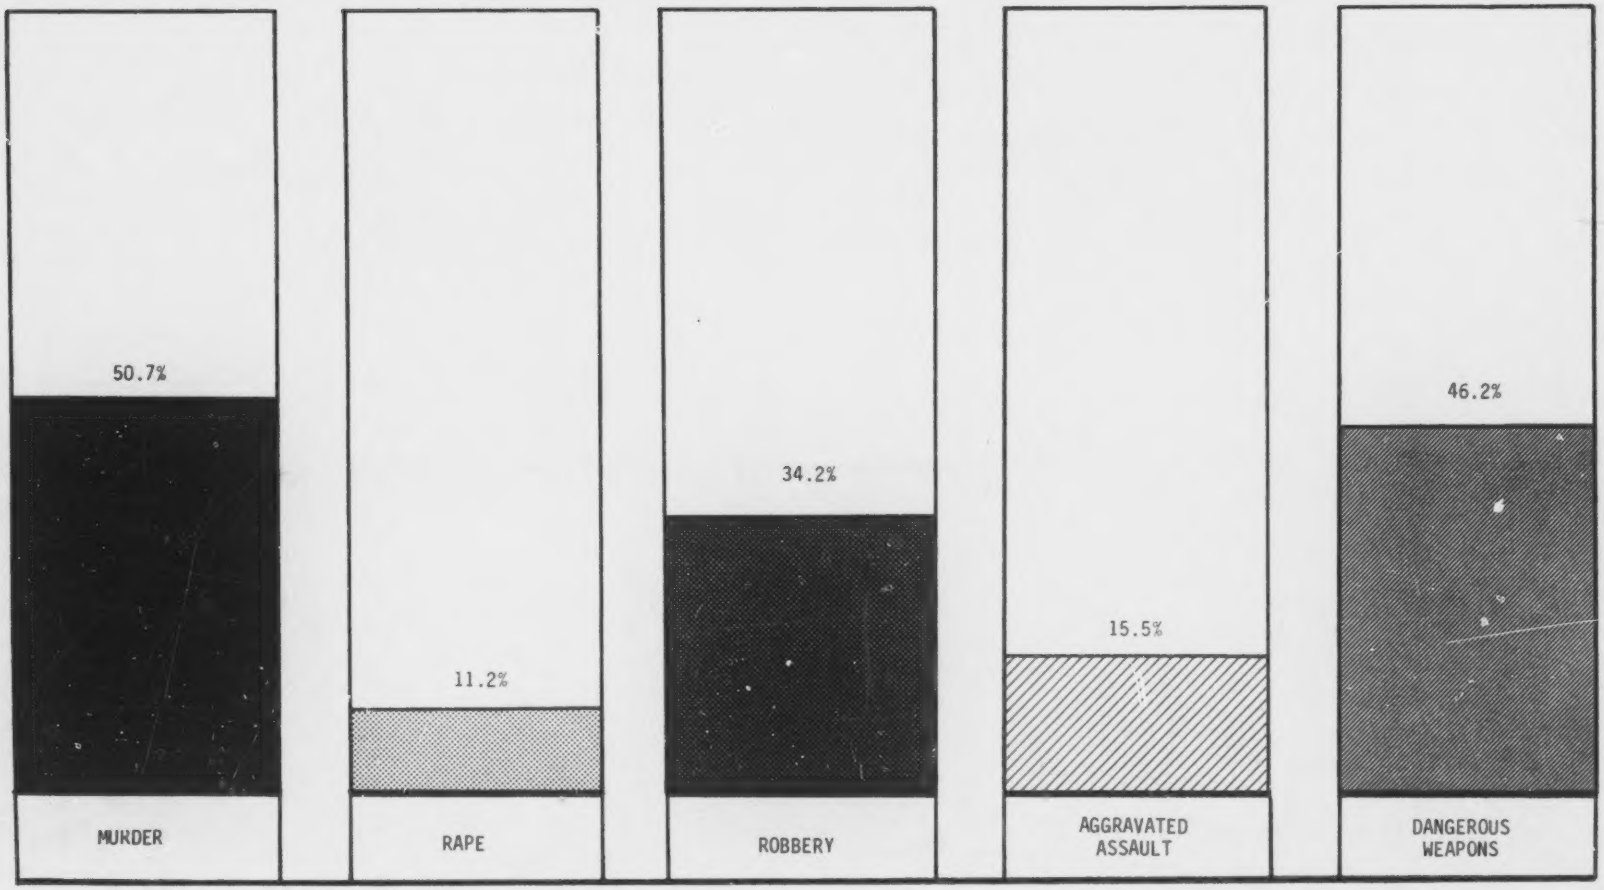
PERCENTAGE OF HANDGUNS INVOLVED IN SPECIFIED OFFENSES
NEW YORK STATE
1982



HOMICIDE 1982

The Offense[1]

Table 1 presents data on homicides by month and area for New York State from 1978 through 1982. There were 2,061 homicides during 1982.[2] The downturn in homicides noted for 1981 accelerated during 1982. There were 116 fewer homicides than last year, for a decline of 5.3 percent. There were 167 fewer homicides than two years ago, for a decline of 7.5 percent. While the last two years have witnessed declines, the number of homicides in 1982 was still above that for 1976, 1977, and 1978. In 1981, the most recent year for which comparable national data are available, New York State's homicide rate of 12.3 per 100,000 inhabitants was the ninth highest among the fifty states.[3] In 1978 the rate was 10.3 per 100,000 inhabitants and New York State ranked fourteenth highest in the country.[4]

Not all areas of the state benefited equally from the decline in homicides.[5] The MPAs actually suffered a 7.3 percent increase. This overall increase in the six MPAs was due to an increased number of homicides in three of the counties making up this area. The other three counties registered declines. The decline in homicides for New York City (6.2 percent) and the Other Areas (14.3 percent) more than offset the rise in the MPAs (Table 1).

Homicides were fairly evenly distributed throughout the year, with a low of 6.5 percent in January and a high of 10.5 percent in December. As this suggests, there was a very slight tendency for the number of homicides to increase as the year progressed (Table 1).

---

[1] The homicides discussed in this chapter were all those reported through the Supplementary Homicide Reporting system from New York State law enforcement agencies for 1982.

The number of homicides in this chapter are higher than those reported in the Uniform Crime Reports (UCR). The UCR system provides for the deletion of cases from the current year when cases originally reported in prior years have been later determined to be false or baseless (unfounded).

[2] A homicide offense was counted for each victim of a homicide event. For example, if two persons were killed by three offenders during a robbery, this was counted as two homicide offenses.

[3] Federal Bureau of Investigation, Uniform Crime Reports 1981, (Washington, D.C.: U.S. Department of Justice, 1982).

[4] Federal Bureau of Investigation, Uniform Crime Reports 1978, (Washington, D.C.: U.S. Department of Justice, 1979).

[5] The regional groups used in this report are: New York City, consisting of the five boroughs of the city (Bronx, Manhattan, Kings, Queens, and Richmond); Other Metropolitan Planning Areas (MPAs), consisting of the six largest counties outside of New York City (Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester); and Other Areas, consisting of the remaining counties.

Homicide was largely a New York City problem. While New York City contained less than 50 percent of the State's population[6] it accounted for the bulk of the homicides (83.4 percent). The remaining homicides were found in the MPAs (11.4 percent) and the Other Areas (5.2 percent). The distribution of homicides among these three areas has remained essentially unchanged for the last five years (Table 1).

Table 2 presents data for the last five years on characteristics of the homicide event: victim-offender relationship, circumstances,[7] number of victims and offenders, location,[8] and weapon use. Reporting agencies were able to discern the victim-offender relationship in 59 percent of the homicides. Of these, 59 percent were committed by offenders who were strangers to their victims. The percentage of homicides committed by strangers has increased each year since 1978.[9] Homicides ususally did not occur in conjunction with another felony, but as the result of an altercation or other circumstance (61.7 percent). Approximately 40 percent of the homicides were related to another felony, and in such cases, the related felony was usually a robbery (79.0 percent).

The vast majority of homicide events resulted in the death of a single victim. Of these single victim offenses, 46.1 percent were killed by a single offender; 12.4 percent were killed by two or more offenders; and 41.6 percent were killed by an unknown number of offenders. For homicides where the number of offenders was known, 75.9 percent consisted of a single victim and a single offender. Of all homicides, 12.6 percent resulted from the action of two or more offenders (Table 2).

---

[6] Bureau of the Census, 1980 Census of Population and Housing: New York, Final Population and Housing Unit Counts, (Washington, D.C.: U.S. Department of Commerce, 1981).

[7] As part of an overall change in their reporting procedures, a submitting agency coded Altercations as Other Circumstances. In order to maintain comparability across jurisdictions for this year, it was decided to merge all Altercation cases into Other Circumstances and to relabel this category as Altercation and Other Circumstances. Within this category, there were a total of 570 altercations, but it was not possible to crosstabulate this category with any other homicide, victim, or offender characteristics.

[8] The location indicator had two values: outside and inside. Outside was defined as a location potentially observable by a police officer on routine patrol. Inside was any other location.

[9] These percentages were based only on homicide cases for which the victim-offender relationship was known. From 1978 through 1982 the percentage of such cases has varied from a low of 42.9 percent in 1980 to a high of 59.3 percent in 1982. This percentage has neither increased nor decreased consistently from 1978 through 1982. It is reasonable to believe that homicides by strangers were less likely to be solved (and therefore to be included in these percentages), thus underestimating the true percentage of victims killed by strangers. If this selection effect remained relatively constant over the years, it would not invalidate comparisons with respect to the percentage distributions across the years.

Homicides were as likely to occur inside as outside. A firearm was the preferred weapon (56.0 percent). When a firearm was used, it was almost always a handgun. Next in frequency of use were cutting or stabbing instruments (24.4 percent), followed by personal weapons such as hands and feet (12.6 percent). The only substantial change from 1981 was a sharp increase in the percentage of homicides carried out with personal weapons.

Table 3 shows that in addition to contributing disproportionately to the number of homicide cases in the state, New York City's homicides were consistently different from the homicides in the MPAs and the Other Areas. New York City homicides were twice as likely to be the work of a group; were more likely to involve a firearm; were more likely to occur as part of a robbery; and were more likely to occur outside. New York City victims were on the average one year younger than victims outside of New York City. New York City victims were also more likely to be male and were more likely to be black. New York City offenders were on the average two years younger than their counterparts outside New York City. They were also more likely to be male and were more likely to be black (Table 3). These differences in offense, victim, and offender characteristics generally suggested that New York City homicides were more related to predatory and "street" violence than were homicides which occurred elsewhere. Similar patterns were noted in 1980 and 1981.

The Victims

More than one-half of all homicide victims were 20 to 39 years old. Most were male. Homicide victims were nearly equally divided between white (55.7 percent) and black (42.5 percent) racial categories. The percentages for age and sex were relatively constant during the five year period ending in 1982. The proportions for race were not directly comparable to reports earlier than 1981 because prior to this date hispanic was a category of the race variable. Since 1981, hispanics have been coded as white, black, or other[10] (Table 5).

Victim Sex. Both males and females were usually killed by a single offender, although this percentage was higher for females than for males. Males were usually killed with a firearm, and usually by a stranger. Males were slightly more likely to be killed outside than inside. In contrast, females were usually killed by a nonstranger and inside. The weapons used to kill female victims were evenly distributed among: firearms; cutting, stabbing, and bludgeoning instruments; and personal weapons.

---

[10] In 1981 a new variable, Ethnicity, was created which had two values: hispanic and non-hispanic. Because ethnicity was underreported and the data received was unrepresentative, this information has not been presented.

Homicides involving female victims suggested a stronger relationship to domestic violence than did homicides in which the victim was a male (Table 9).

Victim Race. There was little relationship between the race of the victim and the weapon used or the victim-offender relationship. Slightly over one-half of both blacks and whites were killed with a firearm. A slightly greater percentage of black than white victims were killed by someone they knew. There was a stronger relationship between victim race and circumstances of the homicide. For whites, 42.0 percent of the homicides were related to another felony. For blacks, the comparable figure was 32.6 percent (Table 10).

Age Interactions. The distribution of homicide victims among the sex and race categories differed by victim age. While the overall percentage of female victims was 17.9 percent, the percentage of females was substantially higher in the extreme age groups: 38.6 percent among victims under ten years of age and 38.8 percent among victims sixty years of age or older (Table 7). Thus, in the extreme age groups, for every 100 female victims there were 159 male victims. For the 10 to 19 age group, for every 100 female victims there were 576 male victims.

The distribution of homicides among racial categories also differed by victim age.[11] Overall, there were 132 white victims for every 100 black victims. However, this represents an average ratio for all age groups. In the under 10 age group there were only 87 white victims for every 100 black victims. Thereafter, for every increase in victim age, white victims increasingly predominated. For the oldest age group (sixty years of age and older) there were 243 white victims for every 100 black victims.

The characteristics surrounding the killing of very young victims suggested that they usually died as a result of child abuse. The very young were almost always killed by a single offender, a nonstranger, inside and under circumstances unrelated to a felony. They usually died as the result of a beating. Additional evidence for the assertion that homicides of the very young were the result of child abuse was revealed upon closer examination of the relationship between the victim and the offender. Of all the victims under 10 years of age, two-thirds were killed by their parents. (Most of the remainder were killed by acquaintances or by strangers. Other family members were rarely involved.)

The killing of persons 10 years of age and older proved to be more difficult to characterize. These victims were similar in that they were usuallly slain by a single offender. While persons in the 10 to 59 age group were usually killed with a firearm, the weapons used to kill elderly victims were evenly distributed among:

---

[11] Racial categories other than black and white have been excluded to simplify the presentation.

firearms; cutting, stabbing, bludgeoning instruments; and personal weapons. Persons in both age groups were equally likely to be killed by strangers. The 10 to 59 age group and the 60 and over age group differed with respect to the circumstances and location of the homicide. The middle age group was similar to the very young in being most likely to be killed during altercations and other circumstances while the elderly were most likely to be killed in connection with another felony. The deaths in the middle age group were evenly divided between inside and outside locations. However, the elderly, like the very young, were most likely to be killed at an inside location. These similarities and differences in the characteristics of the homicides for these three age groups may be a result of the effect age has on how, where and when persons spend their time.[12] The very young and the elderly spend more of their time at home than the middle age group. While both spend a great deal of time at home, only the elderly are logical targets of felony related homicides, such as robbery.

The Offenders[13]

As was true for victims, the vast majority of homicide offenders were males. Offenders were as likely to be black as white. Offenders, on the average, were younger than victims. These patterns have been fairly consistent for the past five years[14] (Table 11).

The propensity for homicide to be a group activity was greatest among offenders under twenty years of age and declined sharply with age. This was also true for the percentage of homicides which were felony connected. Weapon use did not appear to be strongly related to offender age. Homicides by those over 60 years of age were strongly suggestive of domestic rather than "street" violence: none occurred in connection with another felony; most were by a single offender; most offenders knew their victims; and most occurred inside (Table 14).

A slightly higher percentage of black offenders were female than was true of white offenders (Table 15).

---

[12] Hindelang, Michael J., Michael R. Gottfredson, and James Garofalo. Victims of Personal Crime: An Empirical Foundation for a Theory of Personal Victimization. (Cambridge, Mass.: Ballinger, 1978).

[13] The characteristics of offenders were not known in all cases. The percentages on the characteristics of homicide offenders were based only on those cases where offender characteristics were known and reported. The total number of offenders is a minimum estimate, because of the assumption that all victims killed by an unknown offender were killed by a single offender. There are more reported offenders than victims because several offenders sometimes participated in the killing of a single victim.

[14] This statement does not apply to race because the coding of the race variable was changed in 1981 making comparisons difficult across the 1978 to 1982 time period.

Males were twice as likely as females to have killed with others or to have used firearms; four times as likely to have killed a stranger; three and one-half times as likely to have killed in connection with another felony; and two and one-half times as likely to have killed at an outside location. The victims of female offenders were family members about one-half of the time (Table 16).

There were very few differences between black and white offenders with respect to the number of offenders involved or the type of weapon used. For both racial groups, killings usually grew out of altercations and other circumstances. However, black offenders were somewhat more likely than whites to have killed during a robbery (Table 17).

In the aggregate, it appeared that homicide offenders clearly victimized members of their own race. Approximately 87 percent of the white offenders killed white victims, while approximately 76 percent of the black offenders killed black victims (Table 18).

There was a tendency for offenders to victimize persons of a similar age. However, this was not as evident for offenders 16 to 19 years of age; their most frequent targets were 20 to 29 year olds. Nor was it as evident for offenders 60 years of age and older; their most frequent targets were 30 to 39 year olds (Table 19).

Summary

These data on 1982 homicides showed strong similarities with data from prior years: the vast majority of homicides occurred in New York City; males predominated both as offenders and as victims; and there were relatively few interracial killings. A majority involved the use of firearms, especially handguns.

Victim age had a strong impact on the type of homicide. The very young, being physically vulnerable and largely confined to the home, were primarily victims of their parent's violence. Victims 10 through 59 years of age were more subject to slayings at outside locations and during altercations and other circumstances. The elderly were most likely to be killed at an inside location during the commission of another felony, such as a robbery.

When viewed over the last several years, there were some indications that yearly homicide totals may have been on the decline. However, there were more homicides in 1982 than in 1976, 1977, and 1978. The probability of becoming a homicide victim for inhabitants of New York State has continued to increase[15], and New York State's homicide rate has increased relative to the rest of the country. Thus, it is still too early to assume that the current downturn in the yearly homicide totals will continue or to view the decrease as an indication that New York State is becoming a safer place to live.

---

ARSON INCIDENT STATISTICS
NEW YORK STATE 1982

This is the fourth analysis of arsons in New York State to be presented in the annual Crime and Justice report. The data for these analyses are derived from a supplementary arson data collection program begun in 1979 under the Uniform Crime Reporting (UCR) System.

Arson is defined by the Uniform Crime Reporting program as a willful or malicious burning, or attempted burning, of a dwelling house, public building, motor vehicle, aircraft, or personal property of another. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. A "cleared" arson incident is defined as an offense for which a perpetrator has been taken into custody or is otherwise known by police to have committed the crime, but for reasons outside police control cannot be taken into custody.

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule," whereby an offense is counted only if it is the most serious in an incident. Under this program, an arson offense is reported regardless of whether it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for arson in the UCR Part II offense presentations.

In the tables that follow, reported and cleared arson incidents are categorized according to region, type of property, and month of occurrence. Data are presented for New York State and are divided according to the region in which the incident occurred. The three regions into which the data are divided are: New York City (the largest Metropolitan Planning Area in the State), Other Metropolitan Planning Areas (MPAs) and Other Areas. Other Metropolitan Planning Areas include the six largest counties outside of New York City: Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester. Other Areas are the remaining counties of the State including the upstate suburban and rural areas.

Type of property is divided into three categories: structural (including residential, commercial, and other), mobile, and other property. These are more fully defined in the footnotes following the data tables.

As in previous years, estimated values of property damaged were not uniformly reported and therefore were not included in the analysis.

Arsons Reported

There were 13,297 arsons incidents reported in New York State in 1982. (Table 1). 62.1% of these incidents (8,260 cases) occurred in New York City, while the other Metropolitan Planning Areas and the Other Areas accounted for 23.0% (3,052 cases) and 14.9% (1,985 cases) respectively.

Arsons of structures accounted for 81.5% of all arson incidents in New York State. In New York City, structural arsons accounted for 87.2% of all arsons reported, while in the MPAs and the Other Areas they accounted for 67.2% and 80.0% of all arsons, respectively.

Consistent with data from previous years, residential structure arsons remained the most common type of structural arson throughout the state. Examination of these residential structure arsons shows that in New York City the vast majority were "other residential" arsons, a category which includes structures such as apartments, tenements, and hotels. Almost 90% of all "other residential" arsons took place in New York City. 86% of the single occupancy residential structure arsons took place outside New York City, and constituted approximtely one-quarter of the total arsons in both the Other MPAs and Other Areas.

Commercial structure arsons accounted for 16.0% of all arsons in New York State. A regional comparison shows that Other Areas had a higher proportion of commercial structure arsons than New York City and the Other MPAs. "Other commercial" structure arsons were the most frequent form of commercial arson in New York State (10.4% of the total).

There were 2,092 motor vehicle arsons reported in New York State accounting for 15.7% of all arsons. Almost 59% of these occurred outside New York City. 43% of all motor vehicle arsons occurred in the Other MPAs, while only 16.0% occurred in the Other Areas.

The month of July had the most total arson cases (1,244) for the year (Table 2). For New York City, April was the month with the most arson cases (766) and the other areas had different months registering the most cases, indicating no consistent trend as to peak month of occurrence.

Abandoned Structures

Tables 3 and 4 highlight arsons of abandoned structures. These accounted for 25.3% of all arsons in New York State. In New York City 31.4% of all arsons involved abandoned structures. For the Other Metropolitan Planning Areas, the proportion was 17.0%, and for the Other Areas it was 12.4%.

Statewide, residential structures were the most common form of abandoned structures to be targets for arson, with the likelihood greater in New York City than in the other two regions of the State. Almost all arsons in the other residential category of abandoned structures occurred in New York City (96.8%), while only 23.4% of arsons of single occupancy abandoned structures occurred there. Other MPAs accounted for over half (53.1%) of all single occupancy abandoned structure arsons, with 23.4% occurring in the Other Areas.

Arson Incidents Cleared

In 1982, 1,495 arson incidents were cleared (see Table 5). Of these, 1,209 (80.9%) were structure arsons, of which 760 (50.8%) were residential, and 266 (17.8%) were commercial. In all three regions of the state, most clearances were of arsons in the residential category. In New York City, clearances of residential arsons accounted for 67.9% of the total cleared; in the Other MPAs this percentage was 41.3%, and in the Other Areas it was 49.1%.

The 1982 clearance rate for all arsons in New York State was 11.2%, a slight increase over that shown for 1981 (Table 7). This relatively low clearance rate seems to reflect the extreme difficulty in solving a crime in which most of the physical evidence is destroyed. (The clearance rate is the ratio of clearance to the total number of arsons reported, expressed as a percent. Because a 1982 clearance does not necessarily reflect clearance of an offense reported in 1982, the clearance rate should be considered only as a general indicator of processing efficiency).

Arson clearance rates vary by the type of property. Statewide, the highest clearance rate, 27.7% was in the All Other Structures category and the lowest, 7.0% was in the Other Residential category.

Clearance rates in New York City were relatively constant across all property types, with an average rate of about five incidents cleared for every 100 reported. This represents a rate almost identical to the 1981 clearance rate.

Clearance rates in the two other regions of the State were considerably higher, averaging about twenty-two clearances for every 100 reported arsons. There was more variation among the property types, with the lowest rates occurring in the "other mobile" category in Other Areas and "motor vehicle" in Other MPAs. "Other property" showed the highest rate of clearance in the MPAs while public/community arsons were cleared most often in the Other Areas.

As in the previous three years, clearance rates remained relatively stable throughout the year. For the State as a whole, they ranged from a low of 8.1% in January to a high of 13.9% in December (Table 8).

Table 9 presents data on arson clearances involving persons under 18 years old. A comparison with the overall clearance data presented in Table 5 shows that 29.2% of all clearances in the State involved persons in this age group. The proportion of "under 18" clearances varied among the three regions. In New York City, 11.5% of the clearances involved persons under 18 while in the MPAs the proportion was 36.8% and in the Other Areas it was 33.8%.

Summary

13,297 arsons incidents were reported in New York State in 1982. 62.1% of these arsons occurred in New York City. Statewide, 81.6% of the reported arsons were structure arsons; 59.3% were residential arsons, and 25.3% were arsons of abandoned structures. Clearance rates for arson incidents statewide was 11.2%, and ranged from 4.7% in New York City to 25.0% in the Other Areas.

For Arson Tables 1 - 10

1/Includes Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester Counties.

2/Includes apartments, tenements, flats, hotels, motels, inns, dormitories and boarding houses.

3/Includes warehouses, garages and barns.

4/Includes stores, restaurants and offices.

5/Includes churches, jails, schools, colleges and hospitals.

6/Includes out-buildings, monuments and structures under construction.

7/Includes airplanes, boats, trailers and recreational vehicles.

8/Includes crops, timber, fences and signs.

DOMESTIC VIOLENCE IN NEW YORK STATE

The Governor's Task Force on Domestic Violence was established by Executive Order #90 on May 17, 1979, to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes."

The Uniform Crime Reporting System (UCR) is utilized by DCJS as the data collection instrument for obtaining domestic violence data from the local law enforcement agencies. The domestic violence data reflected in this report are based on those offenses which have come to the attention of law enforcement officers, regardless of whether a formal complaint was filed or an arrest made.

Beginning in January 1982, the New York City Police Department began using a newly designed crime incident reporting form. Use of the new form made it possible to get a much more accurate picture of the incidence of domestic violence in the city. Domestic violence crime reporting in New York City was up 97.6% in 1982, showing a total of 16,457 vs. 8,330 in 1981.

In contrast, reporting in Suburban New York City (Nassau, Suffolk, Westchester and Rockland counties) was down 65.4%, showing 2,636 incidents in 1982 vs. 7,609 in 1981. This decrease in reporting was largely due to reporting problems in Suffolk County, where offenses reported were down 87%, showing 721 offenses in 1982 vs. 5,702 in 1981. This reporting problem should be rectified early in 1983. Efforts continue to improve the reporting from Nassau County.

Statewide, the volume of domestic violence offenses reported in New York State reflected a significant increase. A total of 31,051 offenses were reported in 1982 as opposed to 25,998 reported in 1981, an increase of 19.4%. As in prior years, this increase is largely due to improved reporting by the law enforcement agencies across most of the state. Although the reporting continues to improve in most areas, a good deal of work remains to be done. The Field Services and Audit Unit staff will continue to monitor the data collection activity in 1983 and will follow-up on reporting problems on an agency by agency basis.

THE

RESPONSE

ARRESTS

New York State arrests for all offenses total 1,097,845 in 1982, an increase of 24.2% from 1981. Included in this total are the most serious felony arrests as well as summonses issued for violations of local ordinances. The summonses were largely responsible for the increase in the total number of arrests.

ADULT ARRESTS

Arrests for individuals sixteen years of age and over acccounted for 92.3% of the arrest total in New York State. Male arrests made up 86.3% of the adult arrest total and female arrests 13.7%.

Adult arrests for Index Offenses - murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft - accounted for 4.8% of the adult arrests. The 149,110 adult arrests in 1982 were 1.6% above the 1981 total of 146,697.

Arrests for the violent offenses - murder, non-negligent manslaughter, forcible rape and aggravated assault - totaled 48,937, up 6.2% from 1981.

In 1982, arrests for aggravated assault constituted 48.7% of the arrests for violent offenses and robbery arrests an additional 43.6%. Aggravated assault arrests rose 12.8% from 1981 while robbery arrests dropped 0.5%. During the same period aggravated assault offenses declined less than 1% while robbery offenses dropped 10.7%.

Arrests of teenage adults (16-19) accounted for 30.2% of the adult arrests for violent offenses and 42.2% of the adult robbery arrests.

For non-violent offenses - burglary, larceny and motor vehicle theft - adult teenagers constituted 34.0% of the arrest total. Adults sixteen through nineteen accounted for 43.0% of the adult burglary arrests. From 1981 to 1982, there was a 12.5% decrease in burglary arrests for adults sixteen through nineteen.

Among the Index offenses, female arrests were most numerous in the larceny category where they constituted 30.2% of the total adult larceny arrests.

FELONY ARRESTS

Felony arrests totaled 143,035 in New York State in 1982, 4.7% above the 136,565 reported in 1981. New York City reported a 6.2% increase, while the Suburban Areas of New York City (Nassau, Rockland, Suffolk and Westchester counties) rose 1.1% and Upstate was up 2.1%.

New York City reported 68.0% of the felony arrests in New York State. The Suburban Area of New York City was responsible for 11.1% and Upstate made up the remaining 20.9%.

Felony drug arrests showed a 14.5% increase statewide. New York City reported 81.3% of the felony drug arrests in New York State and showed a 15.8% increase from 1981 to 1982. The Suburban Area of New York City accounted for

7.7% of the felony drug arrests and reported a 2.7% increase. Felony drug arrests Upstate made up the remaining 11.0% of the State total and reflected a 14.1% increase.

Statewide, felony drug arrests represented 13.0% of the felony arrests, a slightly larger portion than the 11.9% they made up in 1981.

JUVENILE ARRESTS

New York State reported a total 84,977 juvenile arrests in 1982, 20.3% below the 106,621 reported in 1981. The overall decrease in juvenile arrests was largely accounted for in the "all other" category.

Arrests of juveniles were made for every offense category with the exception of promoting prostitution. The larceny category with 15,144 arrests, had the most juvenile arrests.

Males were arrested in 82.0% of the juvenile arrests and females 18.0%.

Arrests of fifteen year olds accounted for 38.8% of the juvenile arrests and fourteen year olds represented an additional 26.6%.

Juvenile arrests for burglary constituted 22.5% of all burglary arrests and criminal mischief arrests of juveniles 31.4% of the total criminal mischief arrests.

NEW YORK CITY

New York City with 40.3% of the state population reported 68.3% of the total arrests. Arrests for Index offenses in New York City accounted for 53.6% of the total and arrests for violent offenses, 74.2% of the state arrest total.

Adults accounted for 93.6% of the arrests in New York City and reflected a 47.5% increase from 1981. The increase in adult arrests was largely concentrated in the "all other" category.

The 48,070 juvenile arrests reported by New York City were 56.5% of the state total. Juvenile arrests of fifteen year olds accounted for 43.3% of the juvenile arrests.

DRUG ARRESTS

A total of 63,414 drug arrests were reported in New York State in 1982, 13.9% above the 55,678 reported in 1981. New York City reported 66.8% of the drug arrests.

Arrests for opium, cocaine and derivatives showed a 30.0% increase from 1981 to 1982. New York City, with 84% of the opium and cocaine arrests, experienced a 27.5% increase in the arrests while Upstate rose 45.5%.

Marijuana arrests totaled 36,260, 57.2% of the drug arrests in New York State. For marijuana arrests, 22.3% were for sale or manufacture and 77.7% for possession or use. New York City reported 75.9% of the marijuana arrests for sale or manufacture and 53.4% for use or possession.

DANGEROUS WEAPONS

Statewide, dangerous weapon arrests increased 35.0% from 1981 to 1982. New York City reported 67.7% of dangerous weapon arrests and reflected a 48.8% increase in dangerous weapon arrests versus 13.0% Upstate. Arrests for dangerous weapons are not confined to handguns but include other firearms, knives and cutting instruments as well as blunt instruments.

DRIVING UNDER THE INFLUENCE

From 1981 to 1982, arrests for driving under the influence of alcohol or drugs increased 13.8% in New York State. Arrests for driving under the influence of alcohol accounted for 98.5% of these arrests and under the influence of drugs 1.5%.

New York City reported a 35.7% increase in driving under the influence arrests while Upstate rose 12.9%. Upstate reported 95.1% of the driving under the influence arrests.

RACE & ETHNIC ORIGIN DATA

Data on race and ethnic origin were estimated for 500,606 summonses reported from New York City because existing forms do not provide for the reporting of these data. Arrest categories that include estimates for these summonses are use of marijuana, criminal mischief, other gambling, liquor law violations, disorderly conduct, loitering and all other offenses. More than 86% of the summonses are in the "all other offense" category.

INDICTMENTS AND DISPOSITIONS

The following tables represent statistical data on felony indictments, superior court information and dispositions for 1982 and 1981. The information, is obtained from a statistical reporting system based on individual reports of each indictment, each superior court information and each disposition submited by District Attorneys and Special Prosecutors throughout the state. The unit of count in this reporting system is the defendant/indictment. This includes all defendants indicted and all indictments/superior court informations processed as follows:

1. When several defendants are named in one proceeding or indictment, each defendant is counted separately.
2. When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The tables include data on New York State, New York City, the Suburban Area of New York City (Nassau, Rockland, Suffolk and Westchester counties), Upstate, and the four Judicial Departments in New York State.

Tables of data are presented for three categories:

1. All Felony Charges
2. All Felony Drug Charges
3. Class A Drug Charges

The use of offender based statistics and the tracking of each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number -- that is, the number with an equal amount of values above and below it. As a result, median values are not influenced by very large or very small numbers which can affect averages.

It should be noted that the disposition data reported in these tables pertains to cases handled during the specified year by the Superior Courts. These dispositions may be for indictments in the same or previous years.

Defendant-Indictments

The 45,977 indictments reported in 1982 are a record high and reflect a 8.9% increase from 1981. New York City reported a 16.7% increase in indictments while the Suburban Area of New York City and Upstate reported decreases of 1.9%.

Drug indictments rose 26.5% statewide with New York City reporting a 33.9% increase. The Suburban Area of New York City was up 6.2% and Upstate rose 15.5%. New York City was responsible for 71.6% of the drug indictments in 1982 compared to 67.7% in 1981.

Class A drug indictments were up 11.0% for the State despite a 6.9% decrease in New York City. The Suburban Area of New York City with an 88.6% increase was largely responsible for the overall increase in Class A indictments in New York State. Upstate reported a substantial increase of 21.7%. Although New York City made up 62.4% of the Class A drug indictments, the Suburban Area of New York City increased its share from 15.3% in 1981 to 26.1% in 1982.

Dispositions

A total of 38,309 dispositions were reported in New York State for 1982, only slightly higher than the 38,248 reported in the previous year. Despite the small increase frrom 1981 to 1982, the number of dispositions reported in 1982 is the highest in the nine year history of this reporting program.

New York City showed a small increase (0.5%) in dispositions compared to a 6.9% increase in the Suburban Area of New York City and a 4.3% decrease Upstate.

Dispositions from New York City accounted for 56% of the State total versus 18% from the Suburban Area of New York City and 26% Upstate.

Trials accounted for 11.0% of the dispositions in New York State with 25.5% resulting in acquittal and 74.5% in conviction. There has been a steady rise in the percentage of cases convicted as the result of trials. For example, in 1979, 69.0% of the trials resulted in a guilty verdict.

In 1982, the dismissal rate for New York State was 9.3%, while in New York City it was 11.4% compared to 5.3% in the Suburban Area of New York City and 7.8% Upstate. The rate of cases dismissed in New York State has declined gradually over the past five years.

The 32,025 convictions reported in New York State accounted for 83.6% of all dispositions. This rate represents a continual climb since 1977 when the conviction rate stood at 79.4%.

In 1982, New York City reported a conviction rate of 81.3% versus 89.2% in the Suburban Area of New York City and 84.7% Upstate.

Guilty pleas made up 90.2% of the convictions in New York State, jury trials constituted an additional 8.2% and non-jury trials accounted for the remaining 1.6%.

Statewide, Youthful Offender adjudictions were down from 14.1% of the convictions in 1981 to 13.1% in 1982. In New York City, Youthful Offender adjudications made up 10.6% of the convictions while in the Suburban Area of New York City they accounted for 16.8% and 15.5% Upstate. In each of the geographical areas the proportion of Youthful Offenders decreased from 1981.

Sentences to state prison accounted for 33.6% of the New York State dispositions in 1982 and 40.2% of all convictions. In New York City 50.7% of the convictions resulted in prison sentences compared to 30.0% in the Suburban Area of New York City and 26.5% Upstate. Not all convictions reported in these tables are for felonies although they are the result of felony indictments.

Drug Dispositions

A total of 4,922 drug dispositions were reported in New York State in 1982, 16.2% above the 4,236 reported in the previous year. New York City accounted for 63.7% of the drug dispositions, the Suburban Area of New York City 18.2% and Upstate 18.1%. In New York City 44.0% of the convictions resulted in sentences to state prison versus 30.7% in the Suburban Area of New York City and 26.9% Upstate. Local incarcerations accounted for 12.9% of the convictions in New York City, 17.3% in the Suburban Area of New York City and 13.6% Upstate.

Class A drug dispositions decreased 14.5% in New York State from 1981 to 1982 and constituted 16.7% of the total drug dispositions in 1982.

Processing Time

The median time to process indictments through disposition in New York State in 1982 was 114 days, slightly longer than the 111 days required in 1981. During the same period the median time for drug dispositions decreased frrom 130 days to 124 days. Dispositions of Class A drug dispositions dropped frrom 305 days to 260 days.

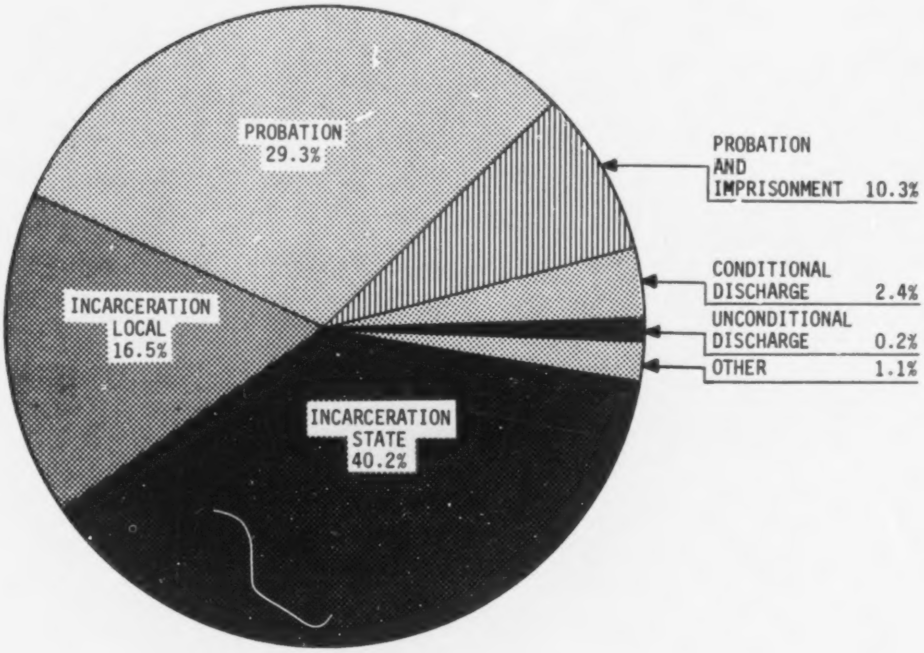
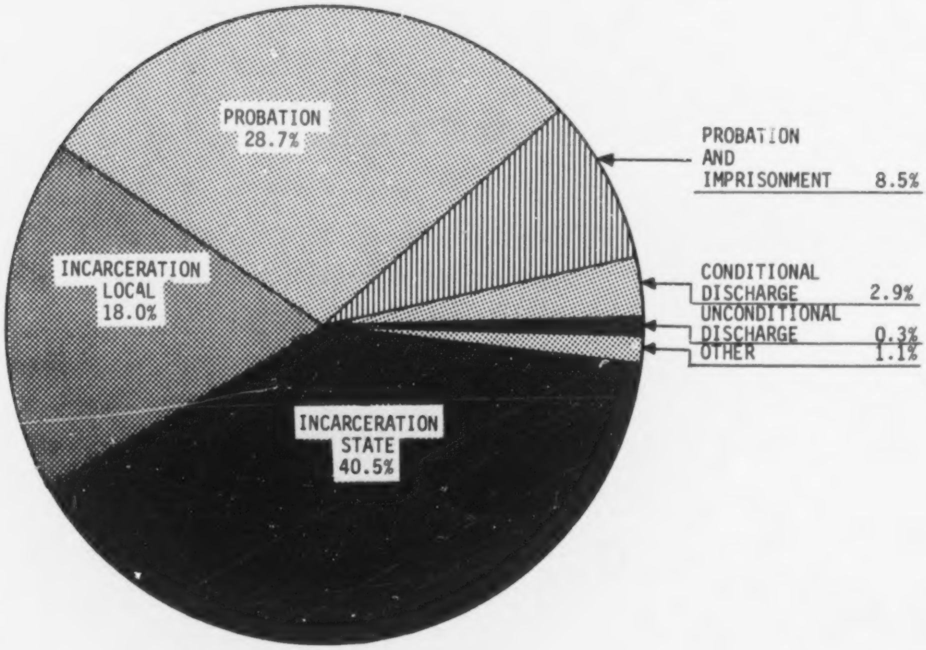
SENTENCES FOR CONVICTIONS OF FELONY DEFENDANT-INDICTMENTS
NEW YORK STATE
1982 - 1981

1982



1981



SENTENCES

Sentences for conviction of murder, rape, robbery, aggravated assault, burglary and larceny and attempts at these crimes are compared for 1981 and 1982. These tables include type of sentence, length of maximum sentence to state prison and maximum length of probation supervision. Included among these sentences are Youthful Offender adjudications and sentences for second and persistent felony offenders. These conditions may exacerbate or mitigate the sentence. As an illustration of more severe sentences in 1982, there were 91 life sentences for convictions other than Class A offenses. Murder convictions increased from 293 in 1981 to 399 in 1982, an increase of 36.2%.

In 1982, 50.8% of the defendants convicted of these offenses were sentenced to state prison and an additional 14.8% received sentences to local institutions. Probation accounted for 24.2% of the sentences and probation and imprisonment contributed another 9.2%.

Within the burglary category, there was a dramatic shift in the degree of convictions. Convictions for burlary 2nd degree increased 154.0% while convictions for burglary 3rd degree fell 25.9%. Convictions for attempted burglary 2nd degree rose 102.0% while convictions for attempted 3rd degree burglary dropped 43.5%. These shifts appear to be the result of 1981 legislation which removed the requirement that the entry or remaining in a building must occur at night to constitute burglary 2nd degree.

COMPARISON OF ACTIVITY AT VARIOUS CRIMINAL JUSTICE POINTS

In this comparison we have examined the offenses of homicide, robbery and drugs as the cases are reported at various points in the criminal justice system. Data shown for these offenses are obtained from several sources. Offense and arrest statistics are compiled from monthly Uniform Crime Reports submitted to the Division of Criminal Justice Services by police agencies in New York State. The felony drug arrest data are obtained from fingerprint cards submitted to the Division in accordance with Section 160.20 of the Criminal Procedure Law. Data on indictment through sentence are provided on individual reports by District Attorneys and Special Prosecutors in New York State and the unit of count is defendant - indictments.

Data on indictment through sentence are not necessarily for arrests and offenses within the same year. Disposition data will also reflect indictment data from previous years.

Homicide

Although homicide offenses declined from 1981 to 1982, arrests, indictments, dispositions, convictions and sentences to state institutions all showed increases. The conviction rate for homicide offenses rose from 76.2% in 1981 to 77.3% in 1982.

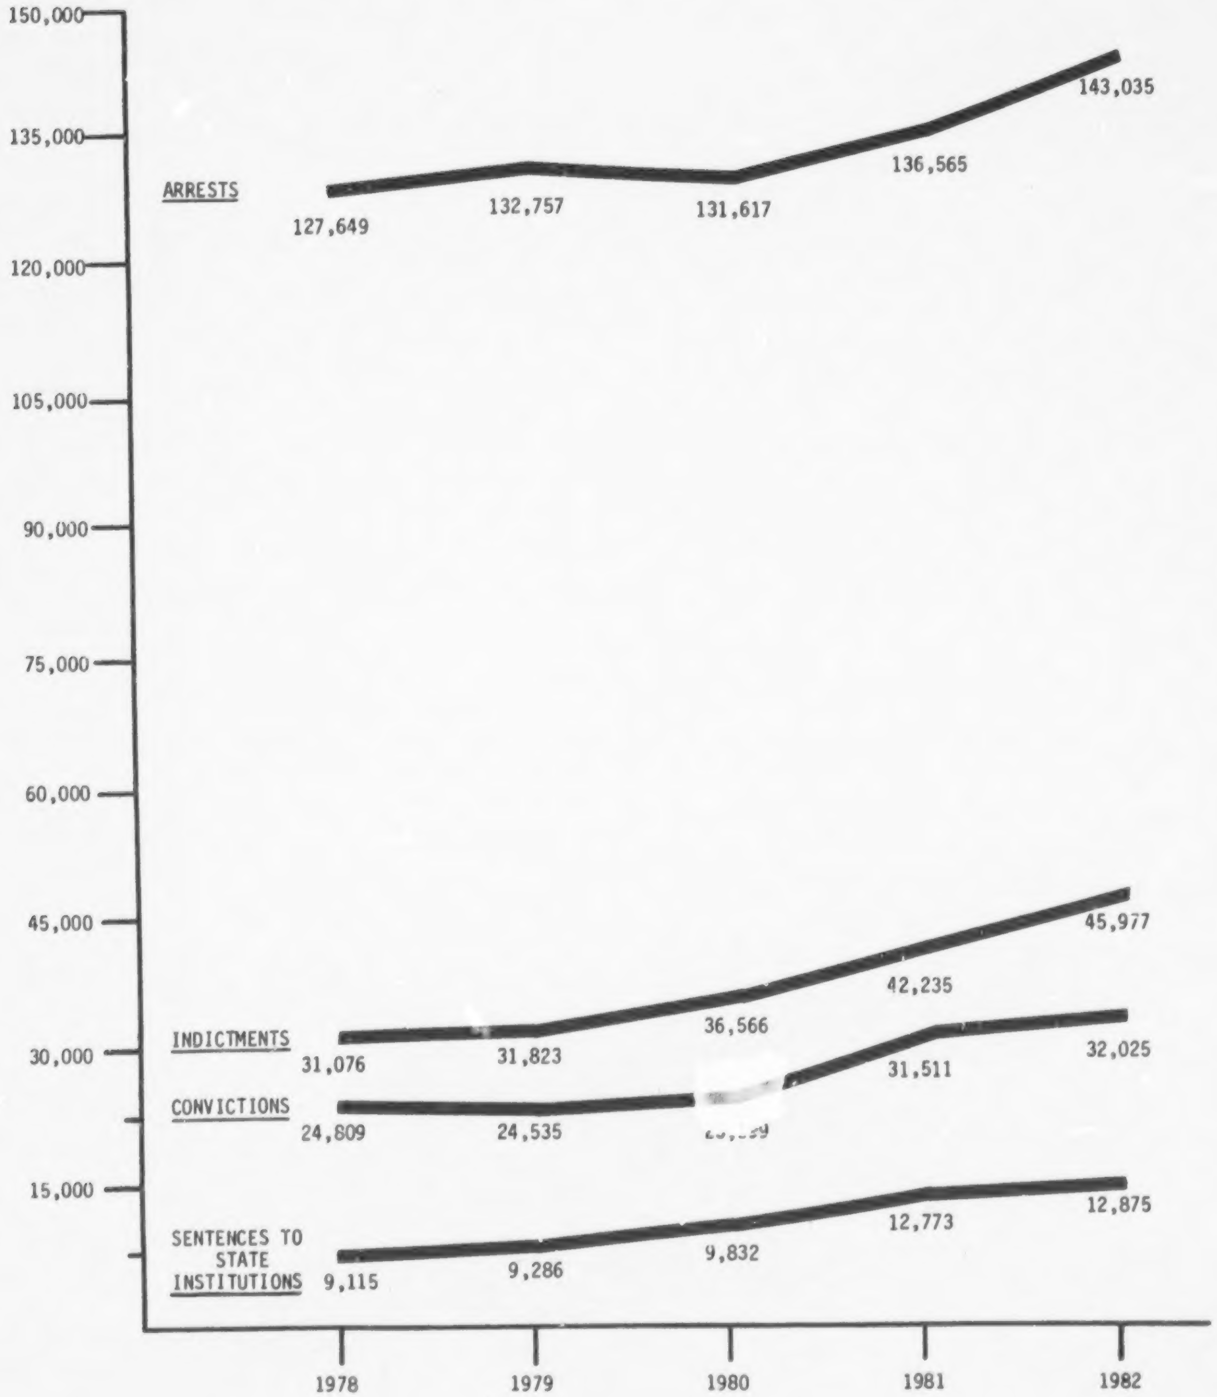
Robbery

Despite the decrease in robbery offenses and arrests, indictments for robbery rose 7.6%. Convictions and sentences to state prison decreased along with the fewer number of robbery dispositions. Convictions accounted for 84.1% of the robbery dispositions and 61.7% of the convictions resulted in sentence to state prison.

Drugs

Drug arrests, indictments, dispositions, convictions and sentences to state institutions all increased from 1981 to 1982. In fact, five year highs were registered at each stage of the reporting process.

FELONY CHARGES AT VARIOUS STAGES OF THE CRIMINAL JUSTICE PROCESS



HOMICIDE CHARGES AT SELECTED STAGES OF THE JUDICIAL PROCESS

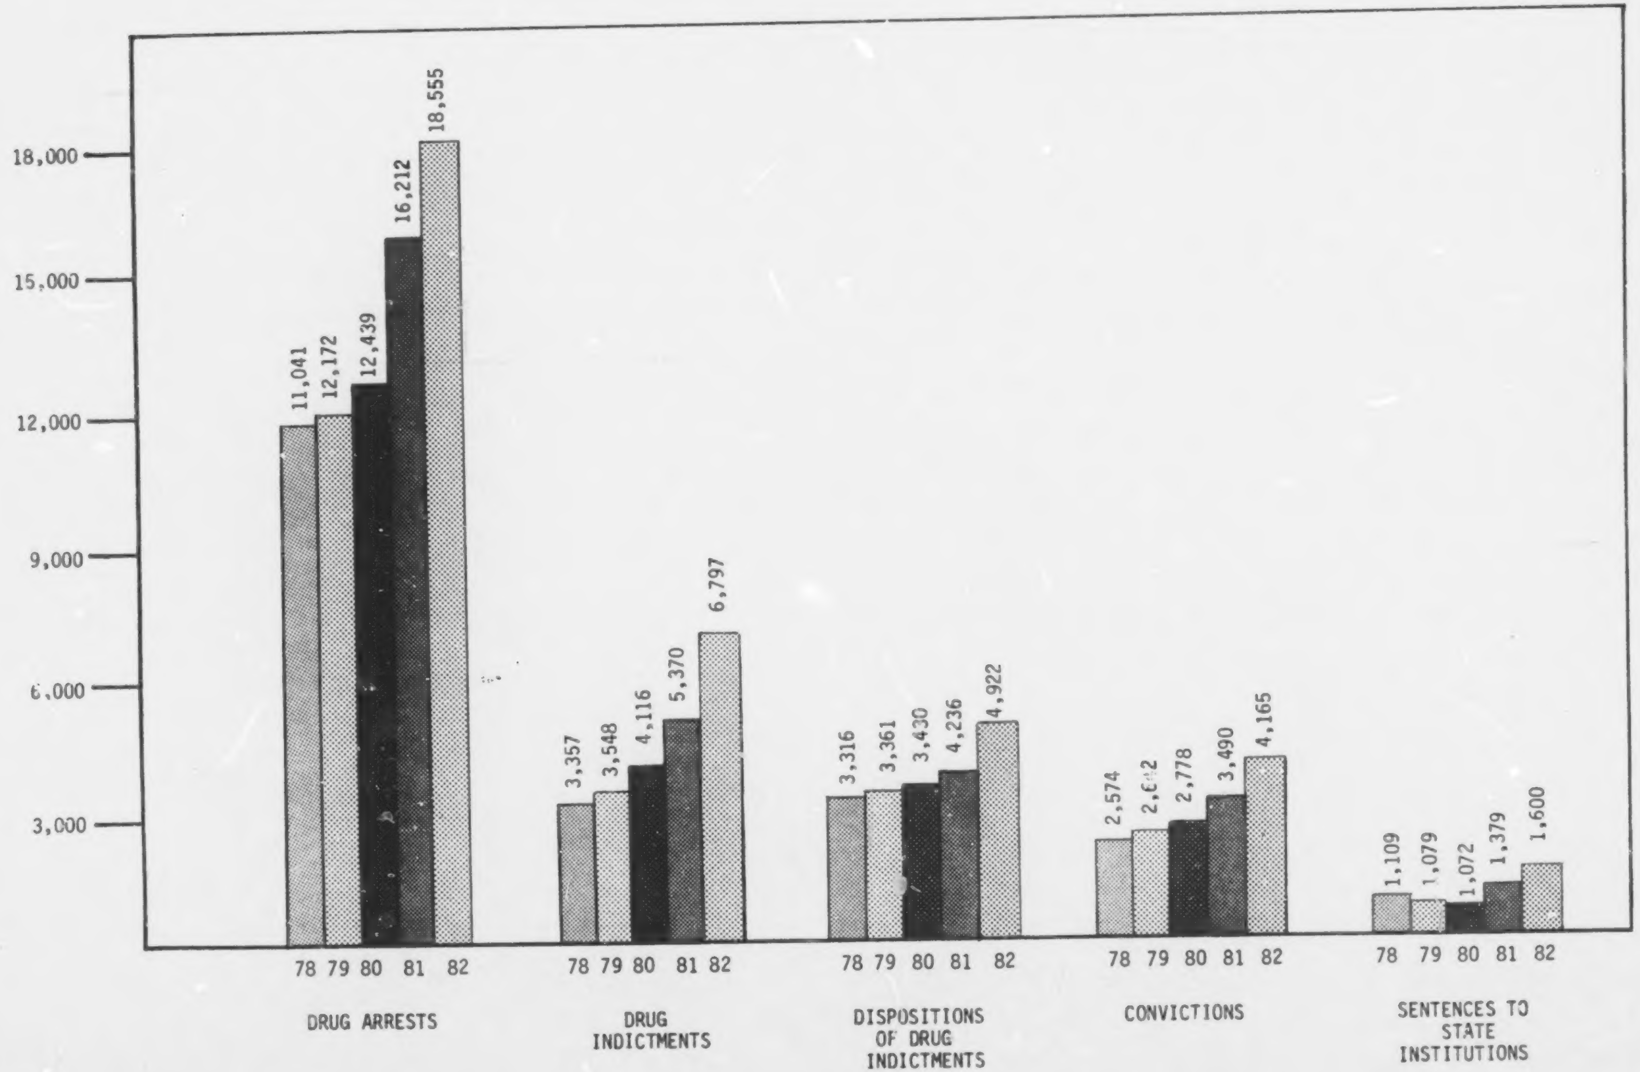
DRUG FELONY CHARGES AT SELECTED STAGES OF THE JUDICIAL PROCESS

NEW YORK STATE

1978 - 1982



LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

During 1982, six (6) law enforcement officers were slain in the line of duty in New York State. The number of officers killed declined slightly from 1981 when seven (7) officers were slain. There were 5,444 officers assaulted while performing their law enforcement functions. This figure represents an increase of 3 percent over 1981 when 5,263 officers were assaulted.

This section of the report analyzes the circumstances surrounding these assaults. In 1982, 86 percent of the assaults resulted in personal injury to the officers.

Weapons

As in prior years, Physical Force was the method most used in assaulting officers -- 73.6 percent. Other Dangerous Weapons were next at 12.1 percent, followed by Handguns at 8.2 percent, Knives at 5.3 percent and lastly, Other Firearms at 0.9 percent.

Activity

Once again "Attempting Arrests" was the activity which led to the greatest number of assaults -- 32.9 percent. "Responding to Disturbance Calls" -- 15.4 percent, "Robberies in Progress" -- 9.4 percent, "Handling, Transporting, Custody of Prisoners" -- 7.6 percent, were the next highest in frequency.

Assignment

Law enforcement officers assigned to two-man vehicles were again the most frequent victims of assault -- 43 percent -- as compared to 13 percent for those assigned to one-man vehicles, 14 percent for detectives or special assignments and 30 percent for all other assignments.

Time

Slightly over 49 percent of all assaults occurred between the hours of 4:00 PM and midnight -- the hours when police are usually their busiest. The hours of 8:00 AM to 4:00 PM recorded the lowest number of assaults -- 23 percent.

LAW ENFORCEMENT EMPLOYEES

Law enforcement agencies in 1982 reported that a total of 65,793 persons were employed. This figure includes both uniformed and civilian personnel and those working full and part-time as well. The 1982 figure represents an increase of less than one percent over the figure reported in 1981. The largest department was, of course, the New York City Police Department with 28,731 employees. The next largest departments, in order of size, were the New York State Police with 3,916, Nassau County Police with 3,879, N.Y.C. Transit Authority with 3,492 and the Suffolk County Police with 3,071 employees.

A total of 84 percent of the employees statewide were uniformed officers of whom 96 percent were employed full time. Slightly more than four percent of the uniformed personnel were females, an increase of one percent over the number in 1981. Over sixteen percent of the employees were civilian. This figure is only slightly higher than the 1981 proportion.

In 1982, DCJS modified the data collection instrument for Agency Strength reports. The major change concerned the manner in which sheriff departments reported their employees and expenditures. Sheriff departments now report separately those costs attributable to law enforcement activities as opposed to those costs chargeable to the operation of the county jails. In light of the change in reporting, the sheriff departments across the state reported a total of 3,589 persons employed in support of law enforcement functions. Of this number, 84 percent were uniformed personnel and 16 percent were civilians. A total of 7,821 persons were employed by special police agencies, such as: authorities (transit, housing, port), parks, railroads, university campuses, etc. This figure represents an increase of slightly over one percent over the 1981 figure.

LAW ENFORCEMENT EXPENDITURES

During 1982, approximately 97 percent of the State's law enforcement agencies submitted an estimate of their operating expenditures for the year. The combined figures totalled $1,961,513,009 of which $801,725,000 was expended by the New York City Police Department; $695,309,220 by other municipal police agencies; $269,055,361 by the specialized police agencies (authorities, railroads, parks, universities, etc.); $112,800,000 by the New York State Police; and $82,623,428 by county sheriff's departments.

In Memoriam

The Division of Criminal Justice Services joins the criminal justice community in extending its sincere sympathy to the families of the following officers who gave their lives in the performance of protecting and serving the citizens of New York State during 1982:

★ ★ ★ ★ ★ ★

PERRY F. BARRETT . . . . Salamanca Police Department
Slain by means of a blow to the head by a mental patient.

JAMES G. CARRAGHER. . . . . New York City Housing Authority Police Department
Slain with a handgun as he approached his home.

GARY E. KUBASIAK . . . . New York State Police
Slain with a 30-30 rifle while responding to a domestic disturbance call.

JOHN SILINSKA . . . . Yonkers Police Department
Slain with a 9-millimeter handgun while attempting to thwart an armed robbery of a local motel.

GEORGE J. WERDANN. . . . . New York City Police Department
Slain with a 357-caliber handgun while pursuing robbery suspects fleeing from a local market.

JAMES WHITTINGTON. . . . . New York City Police Department
Slain with a 38-caliber handgun while responding to a disturbance call.

FEDERAL OFFICERS

THOMAS J. DEVINE. . . . . Drug Enforcement Administration
Died as a result of wounds received from a 38-caliber handgun during a gun battle.

OFFICE OF COURT ADMINISTRATION
UNIFIED COURT SYSTEM

INTRODUCTION

Nearly 2.4 million new cases (2,384,974) were filed in the trial courts of the Unified Court System during 1982. Criminal cases, including all cases initiated by arrest or other action by law enforcement and other related agencies, accounted for 52% of filings. The remaining breakdown was as follows: Civil - 29%: Family - 14%, Surrogates - 5%. Dispositions in the trial courts during 1982 totaled nearly 2.2 million cases (2,158,426). The breakdown of dispositions was as follows: Criminal - 49%, Civil - 33%, Family - 14%, Surrogates - 4%.

The tables on the following pages are from the 1982 Annual Report of the Chief Administrator of the Courts and show caseload activity statistics by type of court.

THE COURT OF APPEALS

The Court of Appeals is the highest court in New York State. In 1982, the Court decided 722 appeals, 570 involving civil matters and 152 criminal cases (Table OCA-I). The basis of jurisdiction in the Court of Appeals in 417 (73%) of the civil appeals disposed of was a reversal, modification or dissent in the Appellate Divisions. Some 124 (22%) of the civil appeals were heard by permission of either the Appellate Division of the Court of Appeals.

In the 570 civil appeals disposed of, 386 (68%) judgments or orders were affirmed, 141 (25%) reversed, 34 (6%) modified, and 9 (2%) dismissed. Among the 152 criminal appeals disposed of, 103 (68%) judgments were affirmed, 40 (26%) reversed, 3 (2%) modified and 6 (4%) dismissed.

APPELLATE DIVISIONS OF THE SUPREME COURT

The Appellate Divisions provide the first level of appeal from the superior trial courts, in addition to performing other functions. In 1982, the Appellate Divisions decided 23,456 motions, heard 4,726 oral arguments and processed 9,781 dispositions of judgments or orders appealed (Table OCA-II).

APPELLATE TERMS OF THE SUPREME COURT

The Appellate Terms of the Supreme Court received 2,507 appeals and disposed of 1,809 in 1982 (Table OCA-III). The First and Second Departments together rendered 1,300 decisions, filed 1,160 per curiam opinions and wrote 118 memoranda (not filed). A total of 5,164 motions were heard or submitted.

CRIMINAL CASES IN SUPREME AND COUNTY COURTS

In the thirteen terms of 1982, there were 47,364 filings in the Supreme and County Courts, an increase of 14% from 1981. Dispositions rose 3% during the same time periods (Table OCA-IV).

CRIMINAL CASES IN TRIAL COURTS OF LIMITED JURISDICTION

The Criminal Court of the City of New York handled 199,503 arraignments and 204,617 dispositions in 1982. City Courts of the State of New York processed 97,980 arraignments in criminal matters and 98,633 dispositions. Arraignments in the District Courts of the State of New York on criminal matters totaled 143,065 and dispositions 106,163 (Table OCA-V).

PROBATION

The New York State Division of Probation collects data from local probation departments each month and compiles this data on probation service delivery annually. The probation services include: intake for family court, investigations conducted for family and criminal courts, pre-disposition supervision and probation supervision.

HIGHLIGHTS OF 1982
BASED ON
REPORTS OF WORKLOAD IN PROBATION DEPARTMENTS

Intake Services

Cases opened for intake services increased 9% from 139,639 in 1981, to 151,698 in 1982. The 45,100 cases opened in New York City represented 30 percent of the statewide total.

Investigations

Probation departments conducted 81,143 regular investigations (pre-sentence, pre-plea, JD and PINS), and 50,414 other investigations. This 131,557 total is a 1% decrease from the 133,240 investigations conducted in 1981.

Pre-Disposition Supervision

There were 15,341 cases received for supervision prior to court disposition. This was a 1% decrease from the 15,441 received in 1981.

Probation Supervision

The Division of Probation has revised its method of calculating probation supervision cases received. In order to eliminate duplicate counting of intrastate transfer cases, transferred-in cases are included and transferred-out cases are deducted from the cases received count.

During 1982, there were 39,247 probation supervision cases received. This was a 1% increase over 1981, when 38,681 cases were received.

Probation departments collected $3,462,861 in restitution payments from probationers during 1982. This was a 14% increase over the $3,035,103 collected in restitution during 1981. An additional $529,128 was collected in fines and fees during 1982.

CORRECTIONAL SERVICES

The New York State Department of Correctional Services has made available for inclusion in the 1982 Annual Crime and Justice Report data concerning admissions to department custody, inmates under custody, and releases from department custody. These data complement other data contained in this report and should provide a better understanding of the criminal justice process.

Under Custody Population (Exhibit 1 and 2)

The number of inmates under custody declined from 12,525 at the end of calendar year 1971 to a low of 12,444 at the close of 1972. This decline began in 1964 and continued over a nine-year period. Contributing to this decline was the Baxtrom decision which led to the release from Department custody of all criminally insane inmates held beyond their maximum expiration dates along with related decisions which ended the practice of holding under custody dangerously mentally incapacitated persons for long periods of time. These decisions, coupled with other factors including a revised Penal Law which became effective in September of 1967, changes in sentencing procedures, and the development of major institutional programs for drug addicts by the state's drug control agency, resulted in an annual net loss in the under custody population which continued through 1971. This situation was reversed in 1973 when admissions exceeded releases for the first time since 1963. This rise in the under custody population has continued through 1982, when the under custody population rose to 27,956 (exclusive of 556 detained parolees), an increase of 124.7 percent over a ten-year period.

Admissions to Department Custody (Exhibit 3)

Admissions registered a steady rise from an annual total of 7,242 in 1971 to 10,272 in 1977. The number of admissions fell to 8,837 in 1978 but resumed an upward trend in 1979 reaching all time highs of 12,723 and 12,716 in 1981 and 1982. The high number of 1976 and 1977 admissions reflected efforts by the Office of Court Administration to reduce a large backlog of felony cases pending before the Supreme Court which resulted in a temporary acceleration of the already high and rising rate of court commitments. A similar effort in 1981 contributed to record numbers of court commitments in 1981 (10,303) and 1982 (10,409). Court commitments account for eight of ten admissions and trends in this category largely shape the flow of offenders into State prisons. Court commitments declined to 4,250 in 1970. From this 1970 low, commitments have risen to a high of 10,409 in 1982, an increase of 144.9 percent. Beginning in 1971, felony commitments rose rapidly, offsetting declines in other types of commitments. Contributing to this trend has been a rise in felony arrests, indictments and court dispositions and an increasing tendency of the courts to commit convicted felons to state correctional facilities. Several more stringent laws enacted in 1973 and subsequent years have added to this increase in commitments. These include the Second Felony Offender Law, which has imposed mandatory indeterminate sentences on such offenders; a drug law which has imposed harsher penalties on drug offenders; and the law imposing mandatory indeterminate terms for all Class B felonies and for certain Class C and D felonies. The trend toward increased court commitments has continued through 1982 reflecting the impact of the violent felony offender legislation which became effective in September 1978.

Releases from Department Custody (Exhibit 3)

Releases from DOCS custody remained relatively stable during the five-year period, 1971-1975, averaging 7,285 annually. In 1976 a sharp rise in releases is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates in the burgeoning inmate population who were subsequently released to parole supervision. 1978 saw a temporary drop in releases which reflected longer minimum periods of incarceration being set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 and 1980 resumed an upward trend, including all time high volumes of parole and conditional releases. A decline in 1981 releases reflects both sentencing changes under the Violent Felony Offender Law as well as change in the manner in which the minimum period of incarceration was determined for a considerable portion of the inmate population. As expected, 1982 releases resumed an upward trend reflecting the growing number of parole eligible inmates within the inmate population.

Reason for Commitment (Exhibit 4)

Of the 1982 commitments, 97 percent were sentenced as felony offenders. The remaining three percent were sentenced as Youthful Offenders. Slightly over one-third (37%) were sentenced as second or persistent felony offenders.

The largest portion (64%) of the 1982 commitments had been convicted of Violent Felony Offenses. Of these VFO commitments, 32% had been sentenced as second felony offenders. Commitments for robbery led the VFO group followed by crimes of burglary, homicide, dangerous weapons, sex crimes and assault.

Among commitments for other felonies, 50% were sentenced as second felony offenders. Of the 3,526 other felonies there were 375 commitments for offenses involving violence or coercion. The largest single category in this group was robbery 3rd which accounted for 53% or 198 commitments. The majority of robbery 3rd cases, 58% or 115, were second felony commitments. The largest portion of the other felonies group consisted of property or drug type crimes, a total of 3,151. Drug felonies was the largest category in this group with 1,224 commitments (12% of total commitments). The proportion of second felony offenders among property offenders (burglary 3rd, grand larceny, forgery, and other) was 60% while only 33% of the drug offenders were committed as second felony offenders.

NEW YORK STATE COMMISSION OF CORRECTION

The State Commission of Correction (SCOC) has oversight responsibility for all correctional facilities within New York State. The Commission makes recommendations to the Governor, and through the Governor to the Legislature, concerning strategies for improving corrections. The Commission identifies issues that affect corrections and problems that have systematic implications and pose a threat to the safety and well-being of prisoners and staff. Included in the Commission's responsibility is the promulgation of minimum standards to serve as guidelines for correctional management, the development of policy level decisions to encourage compliance of those rules and regulations, and the offering of technical assistance.

The Commission has adopted three goals towards which its policy development and evaluative activities are directed:

1) To ensure the humane treatment of all persons confined within correctional facilities;

2) To improve the operations and programs of each correctional facility and the overall correctional system;

3) To improve the functioning of the SCOC in the carrying out of its mandate.

The Commission of Correction is legislatively mandated to investigate, review, amend and enforce standards for safe, sanitary and orderly settings in all correctional facilities in the State of New York (State, Counties, Villages, Towns, New York City and Other Cities), for both staff and inmates. To assist in this effort, the Commission offers technical assistance to facilities and agency administrators through the provision of basic and in-service training for correctional personnel. The Commission approves, and when appropriate, assists in the development of proposed new construction and serves as a central repository for information on the correctional system in New York State.

CORRECTIONAL FACILITY POPULATIONS ACROSS NEW YORK STATE

New York State's county and state correctional facilities experienced an abundance of prisoners in 1982. Overcrowding in correctional facilities has been detrimental to the operation of institutional programs and services, plus put an extra burden on correctional officers. The following will examine the prisoner populations incarcerated in county and state correctional facilities across New York State during 1982 and, where possible, provide comparisons over time.

County correctional facilities, for all practical purposes, are the jails and penitentiaries operated by the 57 counties outside of New York City and are referred to as local correctional facilities. A subset consisting of the local correctional facilities in the six largest counties (except NYC)[1] will also be examined, as well as the 57 counties. New York City maintains a centralized corrections department referred to as the New York City Department of Corrections (NYC/DOC). State correctional facilities are operated by the New York State Department of Correctional Services (DOCS).

Major Findings

- County correctional facilities' prisoner populations increased 23% from 5772 prisoners in November 1980 to 7081 prisoners in November 1982.
- County correctional facilities' prisoner populations increased 7% in 1982 from 6631 prisoners in April to 7081 prisoners in November.
- County correctional facilities' annual admissions increased an absolute 16% between 1977 and 1982 from 98,681 to 114,251.
- Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester Counties' correctional facilities collectively, as the six largest counties outside of NYC, experienced an 18% increase in their prisoner populations in 1982 from 3550 prisoners in January to 4181 prisoners in December.
- The six largest counties (except NYC) correctional facilities collectively operated from 4% to 20% above maximum prisoner capacity during 1982.
- New York City Department of Corrections (NYC/DOC) prisoner population increased 10% in 1982 from 8987 prisoners in January to 9889 prisoners in December.

---

[1] Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester Counties are the subset.

- Department of Correctional Services (DOCS) prisoner population increased 10% in 1982 from 25,766 prisoners in January to 28,249 prisoners in December.
- Department of Correctional Services (DOCS) facilities operated at 14% above their housing capacity in 1982.

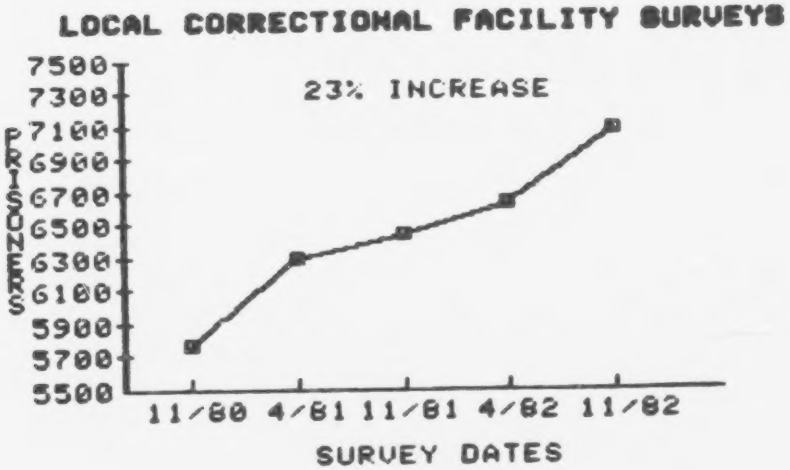
In addition to the major findings' conclusion that, indeed there is a sustained positive growth trend in prisoner populations across New York State, observations concerning adjudicatory classification, and age will be made in the full text of this analysis.

Findings of Prisoner Population Data Analysis

County Correctional Facilities

Prisoner populations at the 56 counties[2] correctional facilities outside of New York City were measured five times from November 1980 through November 1982. During this period of time, the aggregate prisoner population of these counties increased an absolute 23% from 5772 prisoners in November 1980 to 7081 prisoners in November 1982.

CHART I



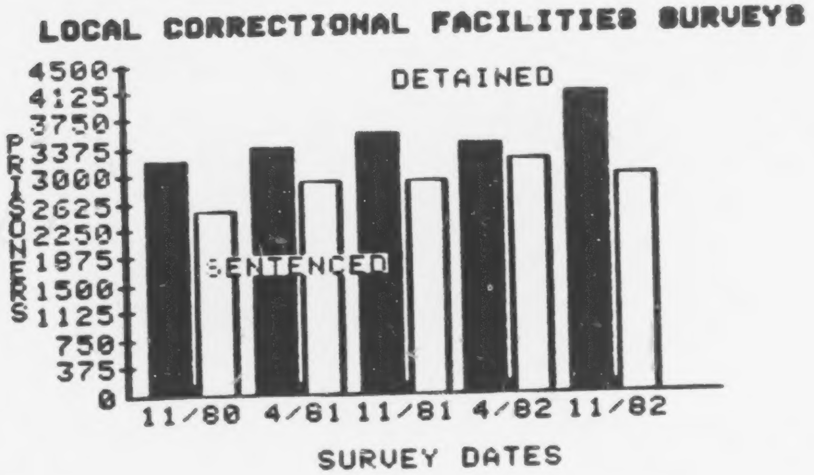
---

[2] Fulton County did not operate a correctional facility for this period of analysis.

This increase in prisoner populations has had an adverse effect on the spatial and operational logistics of county correctional facilities. Extensive use of substitute jails to house prisoners another county jail cannot accommodate, and conversion of some program/services space for housing space, are examples of logistical problems created by the increase populations.

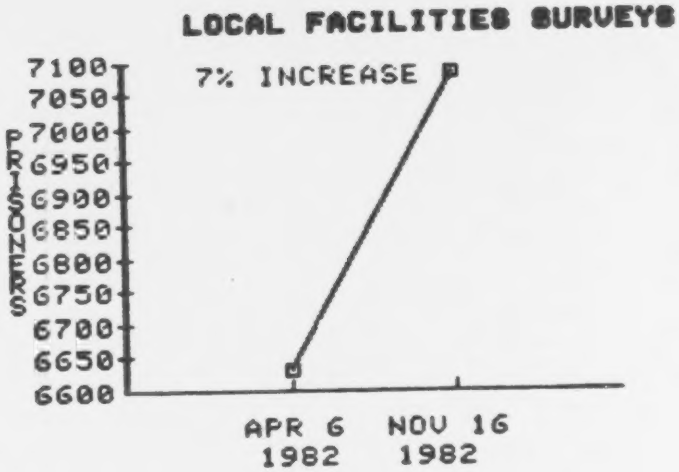
Adjudicatory classification status, i.e., detained or sentenced, of the prisoner populations was measured during this period. Detained prisoners increased slightly as a relative proportion of the entire prisoner population over the sentenced population. November 1980 detained prisoners comprised 56% of the total survey population while the November 1982 detained prisoners comprised 58% of that total.

CHART II



The following chart indicates that the county correctional prisoner populations experienced an increase of 7% in 1982. Telephone surveys of all county correctional facilities' prisoner population levels in April '82 and November '82 indicated 6631 prisoners and 7081 prisoners, respectively, housed in local facilities.

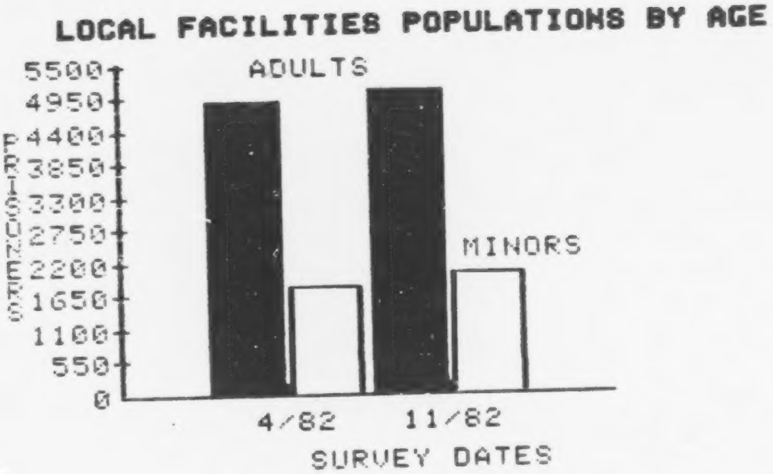
CHART III



Increased prisoner populations during 1982 have further impacted county correctional facilities' ability to maintain the classification standard and in some instances necessitating costly boarding-out of prisoners. In other cases, a county may not possess the physical structure to house all the counties' prisoners and hence must board-out prisoners because their housing capacity is saturated.

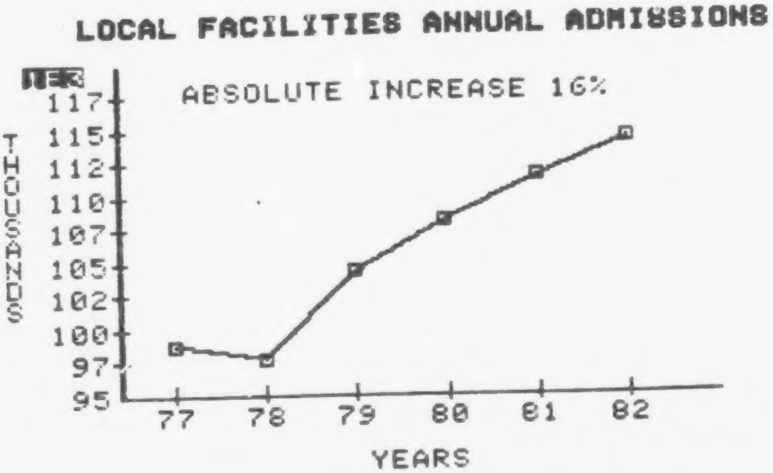
Age classification of the county correctional facilities' prisoner populations surveys undertaken in 1982 indicated that adults comprised 73% of the April total population and 71% of the November total. Relative to the total population, minors, i.e., under 21 years of age, gained 2% in 1982.

CHART IV



County correctional facilities reported annual admissions has risen an absolute 16% from 1977 through 1982; admissions rose from 98,681 in 1977 to 114,251 in 1982.

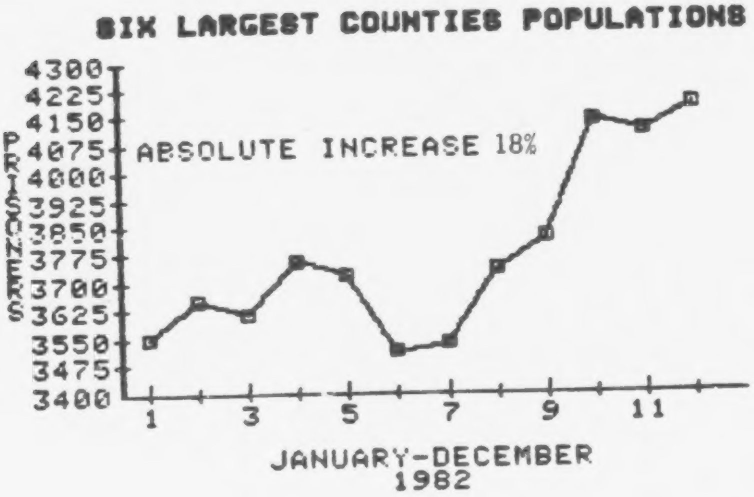
CHART V



A sustained increase in reported admissions is expected for 1982.

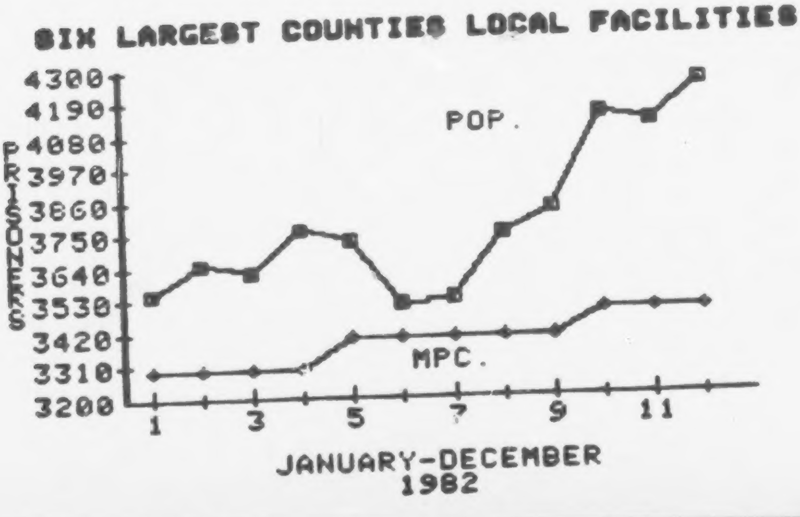
The six largest counties outside of New York City experienced an absolute increase of 18% in their collective prisoner population during 1982. Collective prisoner populations rose from 3550 prisoners in January 1982 to 4181 prisoners in December 1982.

CHART VI



Collectively, the six largest counties (except NYC) county correctional facilities' prisoner population consistently exceeded their collective maximum prisoner capacity ranging from 4% to 20% over.

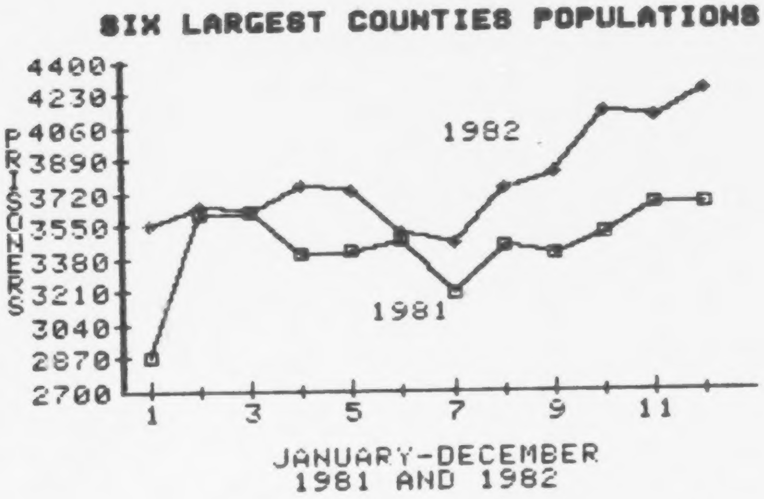
CHART VII



Overcrowding in 1982 has reached an unprecedented point in most of these facilities, in some cases forcing mixing of classifications, housing prisoners in hallways and sending intermittent sentenced prisoners home for lack of housing space.

The six largest counties' (except NYC) county correctional facilities 1982 prisoner population levels collectively exceeded prisoner population levels of 1981.

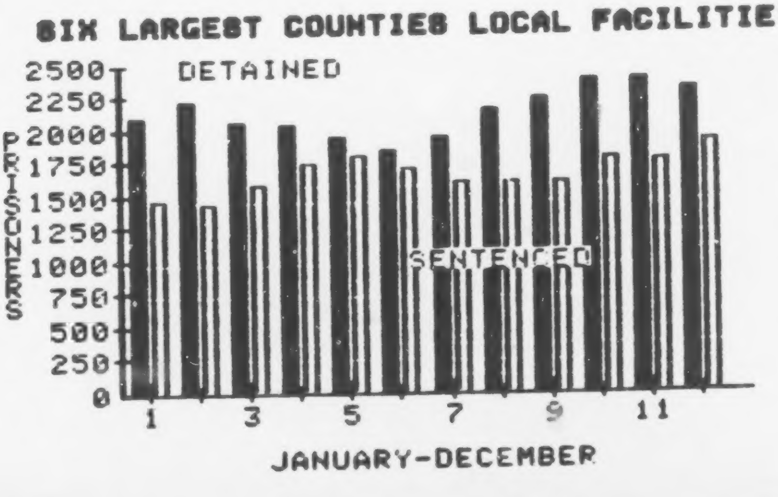
CHART VIII



Collectively, these facilities' prisoner populations were up 14%, measuring from December 1981 to December 1982.

The adjudicatory status of the six largest counties' correctional facilities' prisoner population is illustrated in the following chart. In January 1982, detained prisoners comprised 59% of the total population, and sentenced prisoners 41%; in June 1982, detained 52%, sentenced 48%; and December 1982, detained 55%, sentenced 45%.

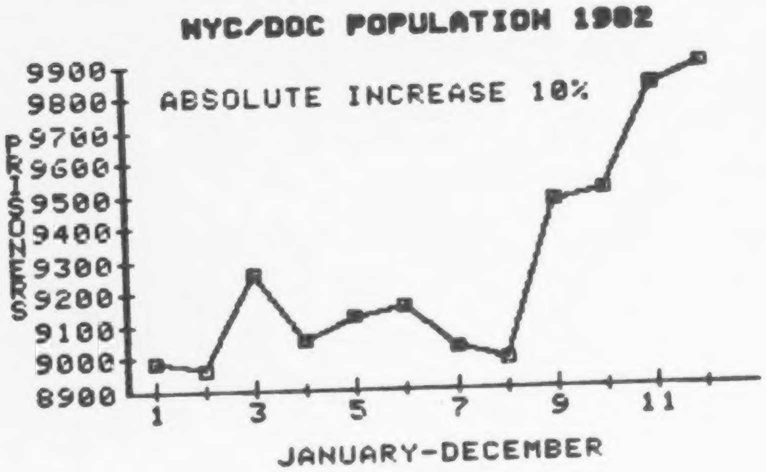
CHART IX



New York City Department of Corrections

The New York City Department of Corrections experienced a 10% absolute increase in its population from 8987 prisoners in January 1982 to 9889 in December 1982.

CHART X

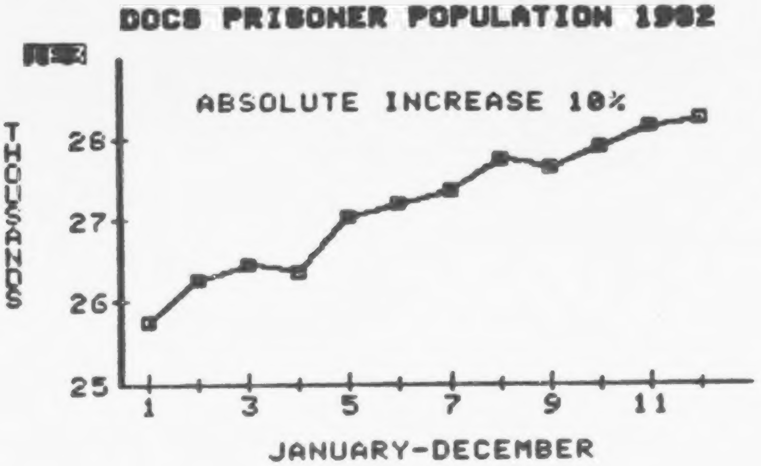


In December 1982, NYC/DOC was operating at 110% of their maximum prisoner capacity.

Department of Correctional Services

The Department of Correctional Services experienced an absolute 10% increase in its prisoner population from 25,766 prisoners in January 1982 to 28,249 prisoners in December 1982.

CHART XI

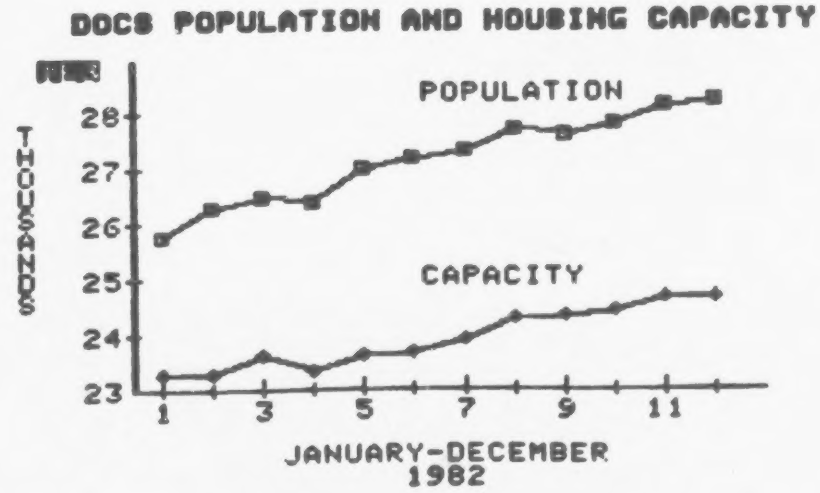


Sustained increases in prisoner population levels have negatively impacted DOCS.

Delivery of services and programs to the prisoner population, across almost the entire system have been adversely affected.

The prisoner population within DOCS consistently exceeded the housing capacity of cells during 1982.

CHART XII



Police Lockups

In 1982, over 122,000 persons were detained in non-NYC police lockups. This exceeds by nearly 8,000 the number of persons detained in county jails and penitentiaries. Specifically, there were 108,035 males and 14,378 females detained in these 178 lockups. This produces an aggregate of individuals held for a period which may be several hours to several days.

As a percentage, 88% of the detained persons were males and 12% were females. In toto, there are 1,290 cells in these lockups, 1,021 having been identified as male cells and 269 as female cells. In some instances, particularly in the smaller departments, there was no distinction made between a male and a female cell. The cell is used by whatever inmate is held at that time, although sexes are not mixed.

In two instances the county operated a lockup on a contractual arrangement with the city. Monroe County jointly operates a facility with the city of Rochester and Onondaga County operates a lockup on a contractual arrangement with the city of Syracuse.

The city of Buffalo reported the largest number of detained persons, 12,672. The Suffolk County Police Department reported 11,731 detainees in its facility in 1982. The range of lockups runs from one cell to as many as 58 in the city of Buffalo. Most of the lockups operate with less than five cells.

Given the large population which passes through these lockups in a year, there should be a genuine concern as to the safe operation of these facilities. The time an individual spends in a lockup may range from a few hours to an entire weekend, depending upon local court practices. In many instances, this may be the first time an individual has been incarcerated and consequently, may result in a more stressful and dangerous situation then is found in large, long-term facilities.

CONCLUSION

County correctional facilities, New York City Department of Corrections, and the New York State Department of Correctional Services all experienced overcrowding in 1982. Most measures indicate that, collectively correctional facilities at all levels were operating at or above their maximum prisoner capacity.

Spatial and operational problems existed across the correctional systems in 1982. Space for housing, programs and services is needed to accommodate the current population levels and, if a sustained postive growth trend continues, future populations. Unless current criminal justice policies are altered, sustained population growth may continue.

DIVISION FOR YOUTH

During 1982 2,470 individuals were admitted to residential facilities operated by the New York State Division for Youth. Of these, 2,015 were first admissions having had no prior contact with Division programs; 281 were readmissions from aftercare; and 174 had experienced previous placements with the Division (Table VI).

For those youths adjudicated Juvenile Delinquents, Restrictive Juvenile Delinquents or Juvenile Offenders, the offenses of burglary, robbery, larceny and other thefts accounted for 73.5% of the admissions. Assaults and homicides were responsible for an additional 11.5% of the admissions for this group (Table I).

Among the 2,470 admissions, 16.2% were placed in secure facilities and an additional 15.0% in limited secure facilities. The largest category among admissions was cooperative/voluntary which accounted for 21.6% of the admissions (Table II).

Juvenile Delinquent adjudications accounted for 64.6% of the admissions and Juvenile Offender adjudications an additional 14.9%. Persons In Need of Supervision were responsible for 13.9% of the 1982 admissions (Table III).

Males made up 82.8% of the admissions and females the remaining 17.2% (Table IV). Table V which lists admissions by ethnicity, shows Blacks accounting for 46.4% of the admissions, closely followed by Whites at 39.4%.

DIVISION OF PAROLE: 1980 - 1982

Parole Board Activity

During the 1980-81 and 1981-82 fiscal years, the Parole Board conducted approximately 27,000 interviews and/or hearings in State correctional facilities to determine parole eligibility dates for certain inmates, the release readiness of eligible inmates to parole supervision and the re-release of parole violators, as well as other administrative hearings.

The number of release interviews conducted by the Parole Board has increased from 11,170 in 1980-1981 to 12,481 in 1981-1982. In 1981-1982, each Board member conducted an average of 1,040 release interviews; the average for the preceding year was 931. The most notable shift has been in the increased number of reappearance interviews for those inmates who were denied parole at their initial appearance and reappeared before the Board for a release decision. During the 1980-1981 period, 2,439 inmates appeared before the Board for interviews whereas in 1981-1982 there were 3,095 reappearances.

Release decisions were granted to 6,265 initial applicants during the two year period (inmates who became eligible for parole release after serving their minimum sentence from April 1, 1980 through March 31, 1982). Reappearance interviews resulted in 3,231 release decisions for inmates who were eligible for parole release prior to April 1, 1980, but were denied release and became eligible again. Re-release interviews for violators resulted in 1,251 inmates released to the community. Other release interviews resulted in 111 inmates being granted parole. The decisions rendered at the various release interviews are summarized in the table below.

Table 1: Comparison Of Outcomes For Release Interviews

	Initial		Reappearance		Violator Re-Release		Other		Total	
	1980-1981	1981-1982	1980-1981	1981-1982	1980-1981	1981-1982	1980-1981	1981-1982	1980-1981	1981-1982
Released	3,503 45%	2,762 33%	1,383 57%	1,848 60%	604 73%	647 67%	76 59%	35 47%	5,566 50%	5,292 43%

Denied	3,852 50%	5,232 63%	851 35%	1,043 33%	156 19%	230 24%	43 33%	33 44%	4,902 44%	6,538 52%
Total Interviews	7,772	8,349	2,439	3,095	829	962	130	75	11,170	12,481

Institutional Parole Services

The workload of parole officer staff within correctional facilities is determined by the number of incoming inmates. Institutional parole officers prepare inmates for parole release and assist the Parole Board in conducting interviews. During the two years, the institutional parole officers conducted 104,207 inmate interviews at state correctional facilities related to Parole Board appearances and pre-release counseling. Table 2 below displays some of the major activities of the institutional parole staff.

Table 2: Institutional Parole Activity During Fiscal Years 1980-1981 And 1981-1982

Activity	1980-1981	1981-1982
Parole Orientation Classes For Inmate A/	1,541	1,297
Inmate Interviews For Parole Board Interviews	39,883	42,669
Pre-Release Inmate Interviews	11,272	10,383
Inmate Group Counseling Sessions B/	179	191
Total	52,875	54,540

A/ Involved an average of 30 inmates per class (1980-81); 33 inmates (1981-82)

B/ Involved an average of 10 inmates in three facilities per session (1980-81); 12 inmates (1981-82)

The enhancement of the role of the institutional parole officer has been a major goal of the Community Preparation Program. The institutional parole staff plays a significant part in identifying the inmates' foreseen needs and problems and including this information in the summary reports prepared for the Parole Board. By discussing factors that will be important upon the inmates' release, and recommending community program referrals, the institutional staff becomes a vital link from institutional to the community phase. An initial assessment of the new program found an encouraging increase on the part of the institutional staff and the inmates to maximize the inmates' ability to cope with the responsibilities and stresses of community life.

Finally, the institutional parole officer continued to participate on the correctional temporary release committees in deciding which inmates were granted temporary work release, furlough and other leaves of absence for good cause. The institutional staff was also involved in committees that gave support and advice to drug and alcohol programs in several correctional facilities.

Community Supervision of Parolees

During 1980-81, there were 23,940 individuals under community parole supervision; 23,990 were under supervision in 1981-82. Approximately 9% were supervised out of state, pursuant to the Interstate Parole Compact.

Table 3: Parolee Movement And Census For Years 1980-1981 And 1981-1982

Movement/Census	1980-1981	1981-1982
April 1 Active Parolees	14,936	15,365
State Inmates Released By Board A/	5,440	5,177
State Inmates Released by Conditional Release	2,634	2,570
Local Inmates Released by Board	525	546
Cooperative Parolee Agreement from Other States	405	332
Total Inmates Released to Parole Supervision B/	9,004	8,589
Total Caseload Removals (Discharges and Returns) C/	8,575	8,437
Dynamic Population for Year D/	23,940	23,990
March 31 Active Parolees	15,365	15,553
Delinquent Parolees E/	3,578	3,893
Total End of Year Caseload (March 31)	18,943	19,446

A/ These individuals were actually released from state prison during the given fiscal year. The total number of releasees should not be confused with the number of inmates granted release by the Parole Board during the same year (cf., page 1). Release interviews are done two months in advance, so that the number of actual releases is usually less than the number of inmates granted release by the end of a year. Moreover, inmates granted release in March, which is the close of the fiscal year, would be counted as releasees in the new fiscal year.

B/ This includes cases released to supervision both within state and out-of-state.

C/ Removals include parolees discharged from parole supervision by expiration of maximum sentence, death, Board action, court order and prison returns.

D/ Dynamic population is the cumulative number of parolees under supervision during all or any part of the year.

E/ Delinquents are those parolees carried by parole officers who are either in the stages of the violation process or are absconders. Not all delinquents in the violation process will have their parole revoked.

Table 3 shows a marginal decline in the number of prison inmates released to parole supervision between 1980-81 and 1981-82. This decline was attributed to such factors as the law enacted in 1980 that requires the court to set an offender's minimum prison term, increasing violent felony convictions during the two year period as a result of the new Violent Felony Offender law as well as the Juvenile Offender law, which added juveniles to the adult processing system. As would be expected, these changes in the sentencing and the concomitant changes in administrative procedures within the criminal justice system as a whole seemed to have temporarily affected the flow of offenders through the system.

The decline in the number of individuals released to parole was not a reflection of a change in Parole Board decision-making policy. For instance, there was virtually no change in the amount of time served in prison prior to release for inmates released in 1980-81 and those in 1981-82. That is, the Parole Board did not change its policy by keeping individuals in prison longer than previously.

Still another indication that the decline in releasees was a transitory quirk reflecting systemic adjustments to the new laws, is the fact that there has been a rising trend in the number of releasees since 1981-82. Based on the first ten months of 1982-83, the total number of releasees for the year is estimated at about 10,000. This represents a 16% increase over 1981-82 in the number of persons released from state prison to parole supervision. The number of state inmates granted parole release by the Parole Board in 1982-83 will exceed that of the 1981-82 by approximately 22%.

Outcome of Parole Supervision

The primary goals of the Division of Parole are to assist offenders released from correctional institutions to adjust to community life and to provide community protection by preventing these individuals from re-engaging in criminal behaviors.

Parole Officers carry out these goals by supervising parolees in the community, coordinating the delivery of available social services, helping to motivate and guide the parolees towards a more positive lifestyle. However, one must realize that not all persons will abide by their conditions of release. The Division must, therefore, fulfill the goal of community protection by returning a violator to prison.

A violation of parole occurs when an individual under supervision violates the conditions of parole in an important respect. These conditions are agreed to in writing by an inmate upon release from prison to community parole supervision. They stipulate, for example, that if the releasee absconds from supervision or re-engages in criminal activity, his/her parole is subject to revocation. The individual may consequently be returned to prison following a series of due process hearings.

In the 1980-81 period, 10% of all parolees under supervision during the year were returned to prison by the courts for committing new crimes or by the Parole Board for violating the rules of parole (e.g., absconding, or illegal use of drugs). During 1981-82, 12% were returned.

While those returned to prison by the Parole Board due to violation of their conditions of parole increased, the number of parolees returned to prison with new court convictions decreased between 1980-81 and 1981-82.

Table 4: Outcome of Parole Supervision

Outcome Measure	1980-1981 A/	1981-1982 B/
Rate of Parolees Returned to Prison with New Court Conviction During Year	3% (N=721)	2% (N=467)
Rate of Parolees Returned to Prison for Violating Conditions of Parole During Year	7% (N=1,604)	10% (N=2,413)
Total Rate of Prison-Returns During Year	10% (N=2,325)	12% (N=2,880)

A/ Rates computed on basis of dynamic population of 23,940 parolees during April 1, 1980 through March 31, 1981.

B/ Rates computed on basis of dynamic population of 23,990 parolees during April 1, 1981 through March 31, 1982.

Parole Supervision Success Rate

In view of the data in Table 4, the parole success rates can be measured in several different ways.

- In terms of total number of parolees not returned to prison, the 1980-81 success rate was 90%, and 88% in 1981-82. This result is an indication of the Division's overall performance in deterring parolee crime and reincarceration.
- From the point of view of enforcing the rules of parole, parolees returned to prison for rule violations cannot really be considered "failures" in the same sense as those who were returned for new criminal convictions. Absconding from supervision is less serious than committing a violent offense. More importantly, a prison return based on a rule violation decreases the chances of a parolee being a threat to community safety. Given this, the success rate was actually 97% in 1980-81; and it increased in 1981-82 to 98%.
- Using a much "softer" measure, the number of deterred parolee delinquents, the success rate for 1980-81 was 77%, and 75% in 1981-82. This estimate is based on the number of parolees who were neither returned to prison during the year for any reason, nor those in any form of delinquent status as of the end of the year. However, not all of these parolees will have their parole revoked during the final hearing process.

Based on the average of these three rates, the composite success rate for parolee supervision in 1980-81 was 88%, and 87% during 1981-82. These results were comparable to that of 1979-80, during which 88% of the parolees remained in a positive status or were favorably discharged from parole.

Parole supervision has continued to be a cost-beneficial alternative to imprisonment. In a recent study, supervision was found to be highly cost-beneficial. During 1980-82, the state saved an estimated 53 million dollars by Parole's efforts in diverting offenders from returning to prison.*

* Collier, W. The Cost-Benefit of Community Parole Supervision In New York State. What Does It Mean For The Taxpayer? NYSDOP, 1982

CRIME VICTIMS BOARD

Claims Analysis

The Crime Victims Board (CVB), established August 1, 1966, compensates eligible victims who have: suffered a serious financial hardship, been physically injured, reported the crime promptly to the police, and been adjudged as being an innocent victim. It is estimated that 15% of reported violent crimes involve losses potentially covered by the CVB. To date, 5.2% of all violent crime victims participate in the program administered by the CVB.

The CVB is designated as the "payer of last resort". Compensation that the CVB is able to provide includes awards for: unlimited unreimbursed medical expenses; unreimbursed loss of earnings up to a maximum of $250.000 per week; unreimbursed loss of support up to an aggregate amoung of $20,000; unreimbursed funeral expenses up to a maximum of $1,500; and lastly, up to $3,000 for vocational rehabilitation. Many financial losses incurred by crime victims involve the repair or replacement of essential personal property damaged or stolen during the course of the crime. These losses, at present, are not able to be covered by the CVB, although current legislation has been introduced for just such purposes.

For fiscal year 1982-83, the CVB received 8,667 claims and expended $6,463,847 exclusively for crime victims.

All New York State law enforcement agencies and officials who have direct contact with crime victims, have claims forms and information brochures on hand to give out relating to the availability of compensation from the CVB. As public awareness of the CVB is heightened, it is anticipated that there will be similar increases in claimants during the next fiscal year.

Under 1979 legislation, the Board's statutory mandate was extended to "actively speak for the rights and interests of crime victims" in the criminal justice system. This legislation added ten new powers and duties to the Board's existing statute. The Board was charged with coordinating the planning programs serving victims of crime on a statewide basis, advocating the rights and interests of crime victims before other units of government, conducting research on the problems affecting crime victims, and advising the Governor and the Legislature on laws and procedures affecting crime victims in New York State.

During 1979 the Board commenced operations of a Senior Citizens Unit. This unit is responsible for handling all claims filed by victims or their dependents who are 60 years or older and to follow up on these cases, including contact with victims or relatives, hospitals, doctors, employers, etc. The unit rendered special assistance to the elderly by assisting them in the preparation of required documentation for processing claims. The unit has significantly reduced the amount of claims that were disallowed for lack of documentation and has demonstrated that the elderly require this special assistance.

WORKLOAD SUMMARIES

Fiscal Year	Claims Received	Payments to Victims	Awards*
1967	196	55,665	43
1968	519	386,585	220
